

Door Numeral Polished Stainless Steel – No. 6/9

Variant code: 3455.6/9.PSS

The **Polished Stainless Steel Door Numeral** is a premium architectural number designed to provide clear and stylish property, room or unit identification. Standing **75mm high**, these contemporary numerals offer excellent visibility while adding a modern finishing touch to residential and commercial entrances. Manufactured from high-quality stainless steel with a polished finish, they coordinate perfectly with stainless steel door furniture and architectural hardware.

Designed for long-lasting performance, each numeral is manufactured from corrosion-resistant stainless steel, making it suitable for both internal and external applications. Each number is supplied complete with **screw fixings** for secure and straightforward installation. Available in a full range of **numbers 0–9**, these numerals provide a practical solution for numbering homes, apartments, hotel rooms, offices and commercial premises.

Ideal for new-build developments, refurbishment projects and replacement installations, the Polished Stainless Steel Door Numeral delivers a durable, low-maintenance and professional identification solution that enhances the appearance of any property.
