# Sugatsune Mounting Plate - 304 Grade Stainless Steel

**Variant code: 180SUS-P6T**

**Sugatsune Mounting Plate - 304 Grade Stainless Steel** is designed to provide a secure and reliable interface between cabinet hinges and furniture panels in concealed hinge installations. Manufactured by **Sugatsune**, a globally recognised specialist in precision architectural hardware, this mounting plate supports accurate hinge positioning while maintaining durability in demanding environments.

Engineered for compatibility with Sugatsune concealed hinge systems, the mounting plate provides a stable fixing platform that ensures consistent hinge alignment during installation. The plate enables efficient hinge attachment while allowing installers to achieve precise door positioning when paired with compatible concealed hinges.

Manufactured from **304 grade stainless steel**, the mounting plate offers excellent resistance to corrosion, making it particularly suitable for environments exposed to moisture, humidity or frequent cleaning. The durable stainless steel construction ensures long-term performance while maintaining structural stability within cabinet assemblies.

Designed to integrate seamlessly into modern cabinet construction, the mounting plate supports reliable hinge operation while maintaining the clean and concealed appearance expected from high-quality furniture hardware. Its robust construction and compatibility with Sugatsune hinge systems make it suitable for both residential and commercial cabinetry applications.

## Product Features

- Mounting plate designed for **Sugatsune concealed hinges**
- **304 grade stainless steel construction**
- Provides stable hinge mounting within cabinet panels
- Supports accurate hinge alignment during installation
- Durable construction for long-term performance
- Compatible with concealed cabinet hinge

systems

## Product Benefits

- Ensures reliable hinge installation
- Maintains stable cabinet door alignment
- Provides corrosion resistance in humid environments
- Supports long-term durability in cabinet construction
- Improves installation consistency for concealed hinges
- Suitable for residential and commercial furniture applications

## Technical Characteristics

- Mounting plate for concealed hinge systems
- Manufactured from **304 grade stainless steel**
- Designed for cabinet panel installation
- Compatible with Sugatsune hinge systems
- Provides secure hinge fixing interface
- Suitable for interior furniture and cabinetry

## Applications

This Sugatsune mounting plate is commonly used in kitchen cabinetry, bathroom furniture, laboratory cabinetry and commercial joinery where corrosion resistance and dependable hinge installation are required. The stainless steel construction makes it particularly suitable for humid or hygiene-sensitive environments, while its compatibility with Sugatsune concealed hinges ensures reliable performance in modern furniture and architectural cabinetry installations.
