1mm Intumescent to suit ZUKF Latches

Variant code: ZIUKFL30G

The **1mm Intumescent Kit for ZUKF Latches** is a precision-cut fire protection solution designed to enhance the fire performance of internal fire doors fitted with ZUKF mortice latches. Manufactured from high-performance intumescent material, the kit expands rapidly when exposed to extreme heat, sealing gaps around the latch to help prevent the spread of fire and smoke. This essential component contributes to maintaining the integrity of fire-rated door assemblies and supports compliance with fire safety regulations.

Designed specifically to fit **ZUKF latches**, the pre-cut components eliminate the need for trimming or modification, ensuring quick and accurate installation. The simple peel-and-stick application allows professional installers and DIY users alike to fit the kit efficiently during new installations or retrofit projects. Manufactured from durable, non-toxic materials, the intumescent remains stable throughout the life of the door, providing reliable long-term fire protection.

Suitable for residential, commercial and public buildings, the 1mm Intumescent Kit for ZUKF Latches is an essential fire door accessory that helps improve safety, supports regulatory compliance and simplifies professional fire door installation.

Product Features

- 1mm intumescent fire protection kit
- Precision-cut to suit ZUKF latches
- Expands under heat to form an effective fire and smoke seal
- Simple peel-and-stick installation
- No cutting or modification required
- Manufactured from high-performance, non-toxic intumescent material
- Suitable for new installations and retrofit applications
- Provides long-lasting fire protection performance

Product Benefits

- **Helps slow the spread of fire and smoke by sealing gaps around the latch**

- **Precision-cut design ensures fast, accurate installation with ZUKF latches**
- **Supports compliance with fire door building regulations and fire safety requirements**
- Simple self-adhesive application reduces installation time
- Eliminates the need for on-site trimming or adjustment
- Durable material provides reliable long-term performance
- Suitable for professional installers and DIY projects
- Ideal for both new-build and fire door refurbishment work

Technical Characteristics

- Product Type: Intumescent Kit
- Thickness: 1mm
- Compatibility: ZUKF Mortice Latches
- Material: Graphite-Based Intumescent
- Installation: Self-Adhesive Peel-and-Stick
- Function: Fire & Smoke Sealing
- Application: Internal Fire Doors
- Suitable For: New Installations & Retrofit Projects

Applications

The **1mm Intumescent Kit for ZUKF Latches** is ideal for **fire-rated timber doors** in **residential developments, offices, schools, hospitals, hotels, apartment buildings, care homes and public buildings**. Designed for use during **new fire door installations, maintenance programmes and refurbishment projects**, it helps improve fire compartmentation by sealing around ZUKF latches in the event of a fire.

Property	Value
Finish	Graphite
Material	Graphite-Based Intumescent
