

24V 10w/m Seamless Cob LED tape, Neutral White, 4000K – 3000mm/30W c/w JB lead

Variant code: LFS24010COBNW.3000J

Illuminate with Uninterrupted Brilliance: Seamless COB LED Tape – 24V Neutral White

Experience a new level of smooth, consistent illumination with our **Seamless COB (Chip-on-Board) LED Tape**. This high-quality **24V LED strip light** delivers a uniform line of **neutral white light (4000K)**, eliminating the unsightly dotting effect commonly found in traditional SMD LED tapes. Perfect for creating sleek, modern lighting designs in both residential and commercial spaces.

This specific unit measures **1200mm (1.2 metres)** in length and boasts a power consumption of **12 Watts**, offering a bright and energy-efficient lighting solution. With a power density of **10 Watts per metre**, this **high-output LED tape** provides excellent lumen output for its size.

Installation is made simple with the included **JB lead and mini plug**, allowing for easy connection to a compatible 24V power supply (sold separately). The flexible nature of the **LED strip** allows for installation around curves and corners, providing versatility for various lighting applications such as:

- **Under cabinet lighting** in kitchens
- **Shelf lighting** to highlight displays
- **Cove lighting** for ambient illumination
- **Accent lighting** in architectural features
- **Backlighting** for signage and displays

Key Features:

- **Seamless Light Output:** Utilising COB technology for a smooth, dot-free line of light.
- **Neutral White (4000K):** Provides a balanced and natural white light, ideal for task and general lighting.
- **High Brightness:** 10 Watts per metre output delivers significant illumination.
- **Energy Efficient:** Operates on a low voltage of 24V, ensuring energy savings.
- **Convenient Length:** 1200mm (1.2 metres) section for versatile applications.
- **Easy Connection:** Comes with a pre-

attached **JB lead** and **mini plug** for quick and simple wiring.

- **Flexible Design:** Can be easily bent and shaped to fit various installations.
- **Durable and Long-lasting:** High-quality components ensure a long lifespan.

Specifications:

- **Voltage:** 24V DC
- **Power Consumption:** 12 Watts (over 1200mm)
- **Power per Metre:** 10 Watts/m
- **Light Colour:** Neutral White
- **Colour Temperature:** 4000 Kelvin (4000K)
- **Length:** 1200mm (1.2 metres)
- **LED Type:** COB (Chip-on-Board)
- **Connection:** JB Lead & Mini Plug
