

24v IP67 LED Dual Bendable Seamless Neon Tape – 10mm x10mm x 3300mm 26.4w – Neutral White c/w 2m JB Input Lead

Variant code: LFS24810NW.3300J

Introducing the **Dual Bendable LED Neon Tape**, a versatile and powerful lighting solution that redefines illumination. This **24V IP67-rated** neon tape is engineered for both indoor and outdoor applications, providing a brilliant and consistent **Neutral White (4000K)** light. Its **dual-bendable design** allows for effortless bending along both the horizontal and vertical axes, enabling you to create intricate and fluid designs that traditional LED tapes can't match.

Key Features and Specifications

- **Ultimate Flexibility:** The **Dual Bendable Seamless Neon Tape** can be bent in multiple directions, making it perfect for custom signage, architectural outlines, and creative installations. Unlike rigid tapes, this **flexible neon light** adapts to any curve or corner.
- **Superior Durability:** With an **IP67 waterproof** rating, this **LED Neon Rope** is fully protected against dust and temporary immersion in water, ensuring reliable performance in harsh environments.
- **Seamless and Dot-Free Illumination:** The **seamless silicon diffuser** ensures a continuous, uniform glow without any visible LED dots, creating a high-end, professional look. This **dot-free neon tape** delivers a smooth, flawless light output.
- **Energy-Efficient Performance:** Operating at **24V** and consuming only **26.4W** over its 3.3-meter length, this **low-voltage LED tape** is both powerful and energy-efficient.
- **Complete and Ready-to-Install:** The tape comes with a **2m JB Input Lead**, simplifying installation and saving you time. This **complete lighting solution** is ready to be integrated into your project.
