

5640 Lever Action Flush Bolt, 25mm wide x 609mm length – Polished Brass Lacquered

Variant code: 25.5640PB.F

**5640 Lever Action Flush Bolt, 25mm x 609mm –
Polished Brass Lacquered**

**Elevate Your Double Doors with Timeless
Elegance and Superior Security**

Introducing the 5640 Lever Action Flush Bolt, a masterpiece of form and function crafted to secure your double doors with a blend of traditional elegance and modern reliability. Measuring a substantial **25mm wide by 609mm in length**, this premium flush bolt is designed for both impressive aesthetics and robust performance.

Key Features:

- Premium Polished Brass Lacquered Finish:** The bolt is meticulously crafted from solid brass and finished with a high-shine polished lacquer. This not only provides a stunning, mirror-like finish that will elevate the look of any door, but also offers a durable protective layer to prevent tarnishing and maintain its lustrous shine for years to come. The classic brass finish is a perfect complement to both traditional and contemporary interiors.
- Smooth Lever Action Mechanism:** Engineered for effortless operation, the innovative lever action allows you to engage and disengage the bolt with a simple, fluid motion. This provides a secure locking mechanism for the secondary or 'slave' leaf of a double door set, ensuring stability and peace of mind.
- Recessed & Flush Fitting:** The bolt is designed to be morticed (recessed) into the edge of the door, creating a clean, flush finish that is virtually invisible when the bolt is retracted. This preserves the clean lines of your door and prevents any obstruction.
- Robust & Secure Locking:** With a solid bolt throw, this flush bolt provides a strong and reliable secondary locking point for your double doors, French

doors, or rebated door sets. It is an essential component for securing doors that don't have a handle or lock.

- **Optimal Dimensions for Tall Doors:** At an impressive **609mm (24 inches) in length**, this flush bolt is ideal for taller doors, making it easy to reach and operate. Its **25mm width** provides a substantial and sturdy profile.
- **Complete with Fixings:** The product is supplied with a matching strike plate and all necessary screws, ensuring a hassle-free installation.

Ideal for:

- Double doors and French doors
- Residential and commercial properties
- New builds, renovations, and restoration projects
- Doors requiring discreet yet robust security

Why Choose Our 5640 Lever Action Flush Bolt?

This is more than just a bolt; it's a statement of quality and a commitment to security. The **5640 Lever Action Flush Bolt** combines time-honoured craftsmanship with practical functionality. Its beautiful **polished brass lacquered** finish not only looks stunning but also offers long-lasting protection. When you choose this product, you are investing in a durable, reliable, and aesthetically pleasing piece of **architectural ironmongery** that will stand the test of time.
