

Blum Aventos HF Top Lever Arm Set – Cabinet Height 840–1200mm

Variant code: 22F3900

Blum Aventos HF Top Lever Arm Set – Cabinet Height 840–1200mm is a **bi-fold lift system lever arm solution** designed for use with Aventos HF lift systems in overhead cabinetry.

Manufactured by Blum, a globally recognised brand in precision-engineered furniture fittings, this component enables smooth and controlled movement of bi-fold cabinet doors. It is specifically designed for cabinet heights between **840–1200mm**, ensuring correct system geometry and reliable operation in taller cabinet applications.

The lever arms guide the folding motion of the cabinet front, working in conjunction with the Aventos HF lift mechanism to deliver balanced opening and closing. Their engineered construction supports larger and taller cabinet fronts, maintaining stability and consistent performance throughout the movement cycle. Integrated adjustment features allow installers to fine-tune alignment, supporting accurate installation and a professional finish.

Designed as part of the complete Aventos system, the lever arm set integrates seamlessly with compatible lift mechanisms, front fixing brackets and accessories. This ensures coordinated system performance and long-term reliability across demanding cabinetry installations.

Product Features

- **Lever arm set for Blum Aventos HF bi-fold lift systems**
- Designed for cabinet heights **840–1200mm**
- Supports controlled and stable bi-fold door movement
- Suitable for tall and wide cabinet front panels
- Compatible with Aventos HF lift mechanisms and fittings
- Adjustable for precise installation and alignment

Product Benefits

- Ensures smooth and balanced operation of tall cabinet doors
- Supports consistent performance in large cabinet installations
- Improves installation accuracy with adjustable features
- Enhances usability of bi-fold lift systems
- Maintains alignment and stability over time
- Contributes to a clean and professional cabinet finish

Technical Characteristics

- Designed for Aventos HF lift system configurations
- Suitable for cabinet heights between 840–1200mm
- Requires pairing with compatible lift mechanism and fittings
- Adjustable components for alignment and positioning
- Engineered for long-term durability
- Install in accordance with Blum technical guidelines

Applications

Blum Aventos HF Top Lever Arm Set is suitable for residential and commercial cabinetry where bi-fold lift systems are used, particularly in kitchen wall units and overhead storage. It is designed for taller cabinets within the specified height range, supporting efficient access and controlled movement of larger front panels. The system is commonly used in modern kitchens, fitted furniture and premium interior installations where ergonomic access, stability and consistent performance are essential.
