Blum Aventos HF Top Lever Arm Set - Cabinet Height 600-910mm

Variant code: 22F3500

Blum Aventos HF Top Lever Arm Set - Cabinet Height 600-910mm is a **bi-fold lift system lever arm solution** designed for use with Aventos HF lift systems in overhead cabinetry. Manufactured by Blum, a globally recognised brand in precision-engineered furniture fittings, this component enables controlled and stable movement of bi-fold cabinet doors. It is specifically designed for cabinet heights between **600–910mm**, ensuring correct system geometry and reliable performance.

The lever arms guide the folding action of the cabinet front, working in conjunction with the Aventos HF lift mechanism to deliver smooth opening and closing. Their engineered construction supports larger and taller cabinet fronts, maintaining consistent motion and stability throughout operation. Integrated adjustment options allow installers to fine-tune alignment, supporting accurate installation and a refined finish.

Designed as part of the complete Aventos system, the lever arm set integrates with compatible lift mechanisms, front fixing brackets and accessories. This ensures coordinated system performance and long-term reliability across a wide range of cabinet applications.

Product Features

- **Lever arm set for Blum Aventos HF bi-fold lift systems**
- Designed for cabinet heights **600–910mm**
- Supports controlled and stable bi-fold door movement
- Suitable for taller and larger cabinet front panels
- Compatible with Aventos HF lift mechanisms and fittings
- Adjustable for precise installation and alignment

Product Benefits

Tel: 01626 333900
Email: info@swshardware.com

- Ensures smooth and balanced operation of taller cabinet doors
- Supports consistent performance across larger installations
- Improves installation accuracy with adjustable features
- Enhances functionality of bi-fold lift systems
- Maintains stability and alignment over time
- Contributes to a clean and professional cabinet finish

Technical Characteristics

- Designed for Aventos HF lift system configurations
- Suitable for cabinet heights between 600–910mm
- Requires pairing with compatible lift mechanism and fittings
- Adjustable components for alignment and positioning
- Engineered for long-term durability
- Install in accordance with Blum technical guidelines

Applications

Blum Aventos HF Top Lever Arm Set is suitable for residential and commercial cabinetry where bi-fold lift systems are used, particularly in kitchen wall units and overhead storage. It is designed for taller cabinets within the specified height range, supporting efficient access and controlled movement of larger front panels. The system is commonly used in modern kitchens and fitted furniture projects where ergonomic access, stability and consistent motion are key requirements.
