Blum Aventos Servo-Drive Motor Pack - For HL, HS & HF Top Lift Systems - Deep Grey

Variant code: 23.A000

Blum AVENTOS SERVO-DRIVE motor pack is the core drive unit designed to deliver electrically assisted opening for AVENTOS lift systems, including HL, HS and HF configurations. As part of Blum's SERVO-DRIVE system, this motor pack enables effortless opening of wall cabinet fronts with a light touch, enhancing user comfort and accessibility in modern cabinetry. Blum is globally recognised for precision-engineered hardware, and this component reflects that focus on performance, reliability and seamless system integration.

Engineered specifically for AVENTOS top lift systems, the motor pack provides consistent and controlled movement, working in conjunction with Blum power supply units and distribution components to ensure smooth operation. It is designed to integrate discreetly within cabinet constructions, maintaining a clean internal layout while delivering dependable functionality. The system responds to a light press on the cabinet front, activating the drive unit to open the lift system, while closing remains controlled through the mechanical lift mechanism.

Product Features

- Designed for **Blum AVENTOS SERVO-DRIVE systems**
- **Motor pack drive unit** for HL, HS and HF lift systems
- Enables **electrically assisted opening**
- Responds to **light touch activation**
- Provides **smooth and controlled opening movement**
- Compatible with Blum **SERVO-DRIVE power supply and distribution components**
- Compact design for **discreet cabinet integration**

Product Benefits

- Enhances user comfort with **effortless opening operation**
- Supports **handle-less cabinet design**

- Provides consistent and reliable performance across lift systems
- Improves accessibility in wall cabinet applications
- Integrates seamlessly within the Blum AVENTOS system
- Suitable for residential and light commercial interiors

Technical Characteristics

- Designed for use with **AVENTOS HL, HS and HF lift systems**
- Requires compatible Blum **SERVO-DRIVE power supply unit**
- Must be installed as part of a **complete SERVO-DRIVE system**
- Intended for **internal cabinet installation**
- Compatible with Blum **cable distribution and control components**
- Installation should follow **Blum technical guidelines and instructions**

Applications

This motor pack is intended for use in AVENTOS lift system installations where electrically assisted opening is required. It is suitable for wall cabinets in kitchens, fitted furniture and other cabinetry applications where ease of access and user comfort are important. Commonly specified in handle-less kitchen designs and contemporary furniture projects, it enables smooth, touch-activated opening while maintaining clean design lines and reliable system performance.
