Variant code: 22Q1076U

AVENTOS HL Top – Lift Up Cross Stabilisation Rod: Enhance Cabinet Stability & Functionality

Ensure smooth, reliable operation of your AVENTOS HL lift-up cabinets with the genuine AVENTOS HL Top Cross Stabilisation Rod. This essential component provides crucial lateral stability, preventing twisting and ensuring your cabinet fronts open and close with precision.

Why choose the AVENTOS HL Top Cross Stabilisation Rod?

- **Superior Stability:** Eliminates unwanted movement and twisting in wide AVENTOS HL cabinet fronts, guaranteeing consistent performance.
- **Enhanced Functionality:** Enables smooth, effortless opening and closing, extending the lifespan of your cabinet system.
- **Easy Installation:** Designed for seamless integration with your existing AVENTOS HL lift-up system.
- **Optimised Performance:** Maintains the intended functionality and aesthetic of your high-quality kitchen or furniture design.

Ideal for:

- Wide AVENTOS HL lift-up cabinet fronts.
- Kitchen wall cabinets, appliance garages, and other lift-up applications.
- DIY enthusiasts and professional installers seeking reliable hardware solutions.
- Anyone aiming for a premium, long lasting cabinet system.
