Blum Aventos Servo-Drive Cover Cap Set - For HL, HS and HF Top Lift Systems - Dark Grey

Variant code: 23.8000DG

Blum AVENTOS SERVO-DRIVE cover cap set is designed to provide a clean and refined finish for lift system installations using HL, HS and HF top lift mechanisms. As part of Blum's integrated AVENTOS system, this component conceals and protects the SERVO-DRIVE hardware, ensuring a consistent and professional internal cabinet appearance. Blum is globally recognised for precision-engineered hardware solutions, and this cover cap set reflects the same focus on detail, durability and system integration.

Specifically developed for use with AVENTOS HL, HS and HF systems, the cover caps fit securely over the SERVO-DRIVE drive units and associated components. This helps protect internal hardware from dust, debris and accidental contact while maintaining full system functionality. The **dark grey finish** is designed to match Blum system components, creating a uniform and coordinated internal aesthetic. Its precision-moulded design ensures compatibility without interfering with lift movement or drive performance, allowing smooth operation to be maintained at all times.

Product Features

- Designed for **Blum AVENTOS SERVO-DRIVE systems**
- **Cover cap set** for HL, HS and HF lift systems
- Provides **protective enclosure** for internal components
- **Dark grey finish** for coordinated system appearance
- Precision-fit design for **secure installation**
- Compatible with Blum **SERVO-DRIVE drive units and mechanisms**
- Maintains accessibility for **maintenance and servicing**

Product Benefits

- Enhances cabinet interior with a **clean,**

Tel: 01626 333900
Email: info@swshardware.com

finished appearance
- Protects components from **dust and accidental damage**
- Ensures a consistent aesthetic across Blum systems
- Supports long-term durability of internal hardware
- Maintains organised and professional installation standards
- Suitable for residential and light commercial cabinetry

Technical Characteristics

- Designed for use with **AVENTOS HL, HS and HF systems**
- Must be installed with compatible Blum **SERVO-DRIVE components**
- Intended for **internal cabinet use only**
- Clips or fits securely onto designated system parts
- Does not interfere with **lift or drive operation**
- Installation should follow Blum **technical documentation**

Applications

This cover cap set is intended for use in AVENTOS HL, HS and HF lift system installations equipped with SERVO-DRIVE technology. It is commonly specified in kitchens, fitted furniture and high-end cabinetry projects where both functionality and internal presentation are important. By concealing and protecting drive components, it contributes to a clean, organised and professional cabinet interior, supporting reliable system performance in both residential and light commercial environments.

Property	Value
Finish	Dark Grey/ Stainless Steel lonside brushed.
