Blum Aventos Servo-Drive Cover Cap Set - For HL, HS and HS Top Lift Systems - Silk White

Variant code: 23.8000SW

Blum AVENTOS Servo-Drive Cover Cap Set - Lift System Cover Caps - Silk White is designed to provide a clean and refined finish for AVENTOS lift systems equipped with Servo-Drive functionality. Manufactured by **Blum**, a globally recognised specialist in cabinet motion technology, this cover cap set enhances the visual presentation of lift mechanisms while maintaining compatibility with modern cabinetry design.

The cover caps are engineered to conceal exposed mechanical and electrical components of the lift system, creating a tidy and uniform cabinet interior. Suitable for use with **AVENTOS HL, HS and HF lift systems**, the set ensures consistent appearance across multiple configurations. The **Silk White finish** offers a bright, neutral tone that integrates well with light-coloured cabinetry and contemporary interior designs.

Designed for seamless integration, the cover caps attach securely to compatible lift mechanisms without affecting system performance or adjustment access. The precision-fit design ensures reliable placement while allowing easy removal for maintenance or servicing when required.

Product Features

- Designed for **Blum AVENTOS Servo-Drive lift systems**
- **Cover cap set** for lift mechanism components
- Compatible with **HL, HS and HF lift systems**
- **Silk White finish** for clean cabinet interiors
- Conceals mechanical and electrical components
- Precision-fit design for secure installation
- Easy to install and remove for maintenance access

Product Benefits

Tel: 01626 333900
Email: info@swshardware.com

- Provides a clean and consistent cabinet interior appearance
- Enhances visual integration of lift system components
- Protects internal components from dust and minor contact
- Supports high-quality cabinet finishing standards
- Allows convenient access for servicing and adjustment
- Complements modern light-coloured cabinetry designs

Technical Characteristics

- Designed for **AVENTOS HL, HS and HF Servo-Drive systems**
- Installs directly onto compatible lift mechanisms
- Does not interfere with system operation or adjustment
- Removable for maintenance and servicing access
- Manufactured for precise fit and compatibility
- Durable material construction for long-term use

Applications

This cover cap set is intended for **AVENTOS lift-up cabinet systems** with Servo-Drive functionality, commonly used in kitchens, storage units and fitted furniture. It is used to conceal lift mechanism components and enhance the overall cabinet appearance while maintaining access for adjustment and maintenance. The **Silk White finish** makes it particularly suitable for contemporary cabinetry where a clean and coordinated interior finish is required.
