Blum Aventos Servo-Drive Cover Cap Set - For HL, HS and HF Top Lift System - Light Grey

Variant code: 23.8000LG

Blum AVENTOS Servo-Drive Cover Cap Set - Lift System Cover Caps - Light Grey is designed to provide a clean and finished appearance for AVENTOS lift systems equipped with Servo-Drive functionality. Manufactured by **Blum**, a globally recognised specialist in cabinet motion technology, this cover cap set enhances the visual integration of lift system components while maintaining compatibility with modern cabinetry design.

The cover caps are specifically designed to conceal exposed mechanical and electrical components of the lift mechanism, creating a tidy and uniform cabinet interior. Suitable for use with **AVENTOS HL, HS and HF lift systems**, the set ensures consistent aesthetic presentation across multiple lift system configurations. The **Light Grey finish** complements a wide range of cabinet interiors, providing a neutral and professional appearance.

Designed for seamless integration, the cover caps attach securely to the lift mechanism without affecting functionality or access to adjustment points. The precision-fit design ensures that components remain protected while maintaining easy installation and removal when required for maintenance or system adjustment.

Product Features

- Designed for **Blum AVENTOS Servo-Drive lift systems**
- **Cover cap set** for lift mechanism components
- Compatible with **HL, HS and HF lift systems**
- **Light Grey finish** for neutral cabinet interiors
- Conceals mechanical and electrical components
- Precision-fit design for secure installation

Product Benefits

- Enhances cabinet aesthetics with a clean, finished look
- Provides consistent visual integration across lift systems
- Protects internal components from dust and minor contact
- Supports professional cabinet installation standards
- Allows easy access for maintenance and adjustments
- Complements a wide range of cabinetry styles

Technical Characteristics

- Designed for **AVENTOS HL, HS and HF Servo-Drive systems**
- Installs directly onto compatible lift mechanisms
- Does not interfere with system operation or adjustment
- Removable for servicing and maintenance access
- Manufactured for precise fit and compatibility
- Durable material construction for long-term use

Applications

This cover cap set is intended for use in **AVENTOS lift-up cabinet systems** with Servo-Drive functionality, commonly installed in kitchens, storage units and fitted furniture. It is used to conceal lift mechanism components and improve the overall cabinet appearance while maintaining access for adjustment and servicing. Suitable for both residential and light commercial cabinetry, it supports clean design integration across multiple lift system configurations.
