Blum Aventos HK-S Tip-on - 2 Pieced Stay Lift Mechanism - Power Factor 960-2215

Variant code: 20K2E00T06.DG

Blum AVENTOS HK-S TIP-ON Lift Mechanism - 2 Piece - Power Factor 960–2215 is designed for stay lift applications requiring handle-less operation, enabling smooth upward opening of cabinet doors with a light push. Engineered as part of Blum's AVENTOS lift system range, this mechanism uses **TIP-ON mechanical opening technology**, allowing cabinet fronts to open without handles for a clean and minimal design.

The HK-S system is suitable for medium to larger wall cabinets, providing stable and controlled upward movement of single-panel doors. The **two-piece mechanism design** allows flexible installation and configuration while maintaining consistent performance across a range of cabinet sizes.

The **Power Factor range 960–2215** defines the lifting capacity of the mechanism when matched with cabinet height and door weight, ensuring optimal performance. The system supports smooth opening and controlled closing movement when correctly configured with compatible components.

Product Features

- Designed for **Blum AVENTOS HK-S lift systems**
- **TIP-ON mechanical opening** for handle-less cabinets
- **Two-piece mechanism design**
- Suitable for **medium to large cabinet applications**
- **Power Factor range 960–2215**
- Smooth upward opening motion

Product Benefits

- Enables clean, **handle-less cabinet design**
- Provides easy push-to-open functionality
- Improves access to cabinet interiors
- Supports flexible installation configurations

- Ensures stable and reliable door movement

Technical Characteristics

- Requires correct **Power Factor selection** based on door size and weight
- Designed for integration within Blum AVENTOS lift system range
- Two-piece mechanism for flexible installation
- Requires compatible TIP-ON components and fittings
- Suitable for various cabinet heights within specified range
- Correct configuration ensures optimal performance

Applications

This lift mechanism is suitable for kitchen wall cabinets, storage units and fitted furniture where handle-less upward-opening doors are required. It is particularly effective in modern cabinetry designs, providing smooth operation, reliable performance and improved accessibility in residential and light commercial environments.
