Blum Aventos HL Top Lift Mechanism - Servo-Drive Compatible - Cabinet Height 390-580mm

Variant code: 22L2500

Blum Aventos HL Top Lift Mechanism - Servo-Drive Compatible - Cabinet Height 390 - 580mm is a **parallel lift system solution** designed for overhead cabinetry where upward and parallel door movement is required. Manufactured by Blum, a globally recognised brand in furniture fittings, the Aventos HL system delivers controlled motion and reliable performance in modern cabinet design. It is specifically suited for cabinet heights between **390–580mm**, ensuring correct system geometry and balanced operation.

The mechanism is engineered for compatibility with **Servo-Drive**, allowing for both manual and electrical opening options. This supports enhanced convenience in contemporary kitchens and fitted furniture applications. The parallel lift action raises the door front upwards while keeping it parallel to the cabinet, maintaining clear access to the interior without obstructing surrounding space.

Integrated adjustment features allow for precise alignment during installation, supporting a clean and professional finish. As part of the wider Aventos system, the mechanism integrates seamlessly with compatible fixing brackets, arms and accessories, ensuring consistent performance across installations.

Product Features

- **Parallel lift mechanism** for overhead cabinet applications
- Designed for Blum Aventos HL lift system configurations
- **Servo-Drive compatible** for electric or manual operation
- Suitable for cabinet heights **390–580mm**
- Smooth and controlled upward parallel movement
- Adjustable for precise installation and alignment

Product Benefits

- Provides unobstructed access to cabinet interiors
- Supports ergonomic operation in overhead storage
- Enhances usability with optional Servo-Drive integration
- Maintains consistent and balanced door movement
- Improves functionality in compact cabinet spaces
- Contributes to a clean and modern cabinet design

Technical Characteristics

- Designed for Aventos HL lift system applications
- Suitable for cabinet heights between **390–580mm**
- **Compatible with Servo-Drive system** components
- Requires correct configuration based on cabinet dimensions
- Adjustable for alignment and positioning
- Engineered for long-term durability and performance

Applications

Blum Aventos HL Top Lift Mechanism is suitable for residential and commercial cabinetry, particularly in kitchen wall units and overhead storage. It is ideal for cabinets where a parallel upward opening motion is preferred, providing efficient access while maintaining clear working space. The system is commonly used in modern kitchens and fitted furniture projects where ergonomic access, functionality and clean design are key requirements.
