

Button-fix™ – Type 2 – Compact Drop-down Bracket only – Pack of 100

Variant code: 171-040-2

Ultimate Security & Seamless Access: Button-fix™ Type 2 – Compact Drop-down Bracket (Pack of 100)

The **Button-fix™ Type 2 Compact Drop-down Bracket** is the industry-leading solution for invisible panel mounting where temporary removal and secure, precise fixing are paramount. Specifically designed for applications requiring a **drop-down action**, this bracket allows panels to be lifted and detached for maintenance, access, or replacement, then securely re-fixed with a simple downward movement and an audible 'click'.

This pack of 100 brackets is ideal for professional joiners, furniture manufacturers, exhibition stand builders, and commercial fit-out specialists looking for a high-volume, reliable, and **cost-effective hidden fixing system**.

Key Features & Benefits

- **Invisible Panel Fixing:** Achieves a completely **hidden mounting solution**, ensuring a clean, modern aesthetic for architectural and interior design projects.
- **Compact Design:** The smaller footprint of the Type 2 Compact bracket is perfect for applications where space is limited or where a less bulky panel thickness is preferred.
- **Drop-down Action:** Uniquely engineered to allow panels to be lifted (dropped down from the wall/frame) for quick and easy access to services, wiring, or maintenance areas. **The best choice for removable access panels.**
- **Load Bearing & Secure:** Provides a strong, reliable, and rattle-free connection, holding panels firmly in place.

- **Easy Installation:** Simplifies complex panel installations. Can be fixed using screws, rivets, or adhesive, making it versatile for various substrates (wood, MDF, metal, composite).
- **High-Volume Value:** A bulk pack of 100 ensures you have enough components for large projects or continuous production runs, offering **excellent value** per unit.

Technical Specifications

Feature	Detail
Product	Button-fix™ Type 2 – Compact Drop-down Bracket (Female component)
Quantity	100 Brackets (Male Button components sold separately)
Fixing Method	Screw or Adhesive (Fixings not included)
Material	Durable, high-strength engineering polymer
Panel Action	Drop-down (Lift-off/Lift-up) for temporary removal
Typical Use	Access panels, removable wall cladding, ceiling tiles, modular furniture, display stands

Frequently Asked Question (FAQ's)

Q1: What are the primary applications of the Button-fix™ Type 2 Compact Drop-down Bracket?

A: This specific bracket is primarily used for securing **removable access panels** (e.g., HVAC, plumbing, electrical access), **lift-off wall cladding**, and **modular display units**. Its drop-down function allows easy temporary removal, making it the **ideal hidden fixing for maintenance access**.

Q2: Does this pack include the 'Buttons' (male component)?

A: No, this pack contains 100 Type 2 Compact Drop-down Brackets only (the female component). The compatible male component, the Button-fix™ Button, must be purchased separately. This allows you to mix and match button types (e.g., standard, self-tapping) based on your panel material and thickness.

Q3: What makes the 'Drop-down' feature so important for an invisible fixing system?

A: The **drop-down mechanism** is key for secure yet temporary panel installation. Unlike standard fixings, this system allows the panel to be simply lifted straight up off the button and then securely re-engaged by dropping it back down—a crucial feature for **quick access and re-installation** without damaging surrounding trim or structure.

Q4: Is the Button-fix™ Type 2 system suitable for heavy-duty applications?

A: Yes, the Button-fix™ system is engineered from a high-strength polymer and provides a robust, professional-grade hold. It is widely regarded as a **heavy-duty panel mounting solution** capable of supporting substantial loads when correctly installed.
