

Button-fix™ – Type 2 – Compact Drop-down + Button – Pack of 100

Variant code: 171-040-21

Button-fix™ Type 2 – Compact Drop-down + Button – Pack of 100

Unlock unparalleled efficiency and precision in your panel installation projects with the **Button-fix™ Type 2 – Compact Drop-down + Button – Pack of 100**. This innovative fixing solution provides a **strong, secure, and concealed** method for attaching panels, acoustic boards, signage, and much more to substrates, making it the **ideal choice for professionals** demanding high quality and ease of use.

Key Features & Benefits

- **Robust & Secure Fixing:** Engineered for demanding applications, the Type 2 Compact Drop-down fix boasts an exceptional **tensile strength** and **shear load capacity**, ensuring your panels stay firmly in place.
- **Invisible Fastening:** Achieve a **clean, modern aesthetic** by completely concealing the fixing mechanism. The panels are simply clicked into place, leaving no visible hardware.
- **Unique Drop-down Functionality:** The integrated **drop-down action** allows for easy upward panel engagement, followed by a secure downward drop, simplifying installation and removal, especially in tight or difficult-to-reach spaces.
- **Compact Design:** The smaller footprint is perfect for applications where space is a premium, or where a less intrusive fixing is preferred.
- **Rapid Installation:** Designed for **speed and efficiency**, the Button-fix system drastically reduces installation time compared to traditional methods, saving you valuable labour costs.
- **Versatile Application:** Suitable for a

wide array of materials including wood, MDF, composite panels, acoustic panels, and decorative surfaces.

?? Technical Specifications

Component		Quantity	Dimensions (Approx.)	Material
Fixes (Female)		100	50 x 30 x 10mm	High-Performance Polymer
				High-Performance Polymer
Buttons (Male)		100	$\text{Diameter} \approx 18\text{mm}$	High-Performance Polymer
Fixing Method	Screw-fix (Screws not included)		---	---
Load Capacity	Consult technical data sheet for specific shear/tensile values		---	---
Engagement	Drop-down action		---	---
Gap Between Panels	Approximately 3mm when engaged		---	---

? Frequently Asked Questions (FAQs)

Question (User Intent)	Answer (Value Proposition)
How does the drop-down action benefit my installation?	The unique drop-down mechanism allows the panel to be lifted slightly and lowered into the final, secure position. This is ideal for installations where you need to attach a panel in a restricted space or near an adjacent surface, offering easy alignment and flexible panel removal .
Is Button-fix Type 2 a strong panel fixing?	Yes, it provides a high-strength, professional-grade solution . It is designed to handle significant shear and

Question (User Intent)	Answer (Value Proposition)
	tensile loads and is a reliable alternative to traditional mechanical fasteners.
Can I remove the panels once they are fixed?	Absolutely. The system is designed to create a demountable and reusable panel installation. You simply reverse the drop-down/lift action to release the panel for maintenance or access.
What materials is this fastener suitable for?	The Button-fix system is extremely versatile , suitable for fixing interior and exterior panels made from materials like MDF, plywood, solid wood, laminate, composites, and decorative sheet materials.
Why choose the Compact version?	The compact size is specifically engineered for applications with limited space or for smaller, lighter panels. It offers the full security of the Type 2 mechanism in a smaller footprint.

Order your Button-fix™ – Type 2 – Compact Drop-down + Button – Pack of 100 today and start experiencing faster, stronger, and completely concealed panel installations.
