

Button-fix™ – Type 2 – Compact Push-on + Button – Pack of 100

Variant code: 171-040-11

The **Button-fix™ Type 2 Compact Push-On Bracket & Button** is a complete concealed fixing solution designed for fast, secure and completely invisible mounting of removable panels. Supplied as a **pack of 100 complete Bracket and Button sets**, this innovative system provides effortless push-on installation and quick removal, making it ideal for access panels, furniture, architectural joinery and commercial fit-outs.

Designed for **90° panel-to-frame connections**, the Type 2 Compact features a reduced installation depth compared to the standard Type 2, making it perfect for shallow frames and 18mm panel apertures. The compact push-on bracket is manufactured from durable **Acetal engineering polymer**, while the matching Button is moulded from **30% glass-filled Nylon PA6** for outstanding strength and durability. Once installed, the fixing remains completely hidden, creating a premium screw-free finish while allowing simple panel removal whenever access is required.

Whether used for service panels, commercial interiors or bespoke furniture, the Button-fix™ Type 2 Compact delivers professional concealed fixing with rapid installation and dependable long-term performance.

Product Features

- Complete Button-fix™ Type 2 Compact Bracket and Button set
- Supplied as a pack of 100 complete sets
