

Button-fix™ – Type 2 – Compact Push-on + Button – Pack of 100

Variant code: 171-040-11

Button-fix™ Type 2 Compact Push-on + Button – Bulk Pack of 100: The Ultimate Invisible Panel Fixing Solution

Unleash the power of **fast, invisible, and secure** panel installation with the **Button-fix™ Type 2 Compact Push-on + Button – Pack of 100**. Engineered for efficiency and a flawless finish, this bulk set is the **professional panel connector** trusted by tradesmen for quick-assembly furniture, service access panels, and interior fit-outs.

Key Product Features & Benefits

- **Invisible Fastening System:** Achieve a truly seamless, high-end look with **secret fixings**—no visible screws or bulky hardware. The panels simply push-on and click into place.
- **Compact Design:** The **smaller installation depth** compared to the original Type 2 allows the button to be fitted to the edge of an 18mm (3/4") panel aperture, making it **ideal for shallow frames and access windows**.
- **90° Connection:** Perfectly designed for attaching panels at a **90-degree angle** to a carcass or frame, ensuring structural integrity and precise alignment.
- **Easy Push-on Engagement:** The **straight push-on fix** provides **effortless panel removal** when service access is required—a critical feature for plumbing, electrical, and HVAC access panels.
- **Robust & Durable Construction:** Made from high-quality, glass-filled Nylon PA6 (Button) and Acetal (Push-on Fix) for exceptional **strength and longevity**. A single Push-on Fix can withstand an approximate disengagement force of

20kg.

- **Bulk Value Pack:** This **Pack of 100** (50 x Buttons and 50 x Fixes, or 100 complete sets, depending on product configuration) provides the best **value** for large projects or commercial fit-outs, ensuring you have the quantity needed for major installations.

FAQ (Frequently Asked Questions)

Q: What is the primary function of the Button-fix Type 2 Compact?

A: The primary function is to provide a secure and completely invisible fixing solution for attaching panels at a 90° angle, particularly for applications where quick and easy service access is essential, such as behind bath panels or in washroom ducts.

Q: How much weight can a Type 2 Compact Fix support?

A: A panel fixed with four Type 2 Fixes can typically support a vertical load weighing up to 50kg (provided screws and substrate are correctly matched). Each individual Push-on Fix requires approximately 20kg of force to disengage.

Q: Is a special tool required for installation?

A: While a dedicated Fix Marker accessory is available for simplified, accurate alignment without measuring, the fixings can be installed using standard countersunk screws and basic hand tools.

Q: Can this product be used on panels with zero clearance?

A: Yes, a major benefit of the Type 2 Push-on engagement is that it is ideal for panels with no clearance above or at the side, requiring only a straight push to engage.

Q: What material are the Button-fix components made from?

A: The Buttons are made from durable, glass-filled Nylon PA6, and the Push-on Fixes are made from Acetal, ensuring a long-lasting and reliable connection.
