

Button-fix™ – Type 2 – Compact Push-on Bracket only – Pack of 100

Variant code: 171-040-1

Button-fix™ Type 2 – Compact Push-on Bracket (Pack of 100)

The **Button-fix™ Type 2 Compact Push-on Bracket** offers a **fast, accurate, and completely concealed** method for fixing panels, including wall and ceiling panels, access hatches, upholstered panels, and signage. This pack of 100 brackets is the essential component for securing panels using the innovative Button-fix system, providing **robust, hidden panel fixing** with a simple 'push-on' engagement.

Key Features & Benefits

- **Compact Design:** The **minimalist footprint** is perfect for applications where space is limited, ensuring the fixings remain unseen without requiring deep recesses.
- **Easy "Push-on" Engagement:** Panels simply snap onto the corresponding Button-fix buttons (sold separately), providing **tool-free panel mounting** and **quick installation**.
- **Concealed Fixing:** Provides a **seamless finish** with **invisible panel fixing**, maintaining the aesthetic integrity of the installation.
- **Robust and Secure:** Engineered for strength, these brackets offer a **high-load bearing capacity** and a **firm, rattle-free connection** suitable for various panel materials.
- **Versatile Application:** Ideal for **architectural panel systems, exhibition stands, marine interiors, RVs/campervans, and bespoke joinery** where quick access and a clean look are paramount.
- **Durable Material:** Manufactured from a **high-performance polymer** for long-lasting use and resistance to wear.
- **Optimised for Efficiency:** Buying in a **Pack of 100** provides **bulk value** and ensures you have enough components for large-scale projects or consistent

manufacturing needs.

Technical Specifications

Detail	Specification
Product	Button-fix™ Type 2 – Compact Push-on Bracket (Fixing component only)
Quantity	100 Brackets per pack
Engagement Type	Push-on
Compatibility	Used with Button-fix Buttons (Type 1 or Type 2, sold separately)
Panel Thickness	Suitable for a minimum panel thickness (Check button requirements)
Material	High-performance Engineering Polymer
Colour	Black (typically)
Installation	Screw fix to the panel (screws not included)

Frequently Asked Questions (FAQ):

Q: What is the Button-fix™ Type 2 Compact Push-on Bracket used for? A: It is a component of a **concealed fixing system** used to **secure panels** to walls, ceilings, or frames, popular in **joinery, architectural projects, and exhibitions**.

Q: Does this pack include the buttons? A: No. This pack is for the **Bracket only (Pack of 100)**. The corresponding **Button-fix Buttons** (Type 1 or Type 2) must be purchased separately.

Q: How do you install a panel using the Button-fix system? A: The **buttons** are screwed to the wall/frame, and the **brackets** (this product) are screwed to the back of the panel. The panel is then simply **pushed onto the wall** to engage the buttons into the brackets, creating a **secure, hidden lock**.

Q: Is the Button-fix Type 2 suitable for high-load applications? A: Yes, the system is designed for **robust panel mounting** and is highly regarded for its **load-bearing capacity** and secure hold in professional applications.

Q: Can this bracket be used for removable access panels? A: Absolutely. Its **push-on, pull-off design** makes it ideal for easily **removable access panels**, upholstered items, and service hatches.
