Button-fix™ - Type 3 Bonded Plate with Screws and Nuts - Push-on - Pack of 100

Variant code: 171-031-1

Button-fix™ Type 3 Bonded Plate with Screws & Nuts is a professional concealed push-on fixing system designed for secure removable panel mounting and flush-fitting applications. Combining the reliable Type 3 push-on connector with bonded plates, screws and nuts, this fixing kit provides strong mechanical engagement and efficient installation for commercial interiors, furniture manufacturing and modular panel systems.

Engineered for precision alignment and dependable retention, the Type 3 Bonded Plate system allows panels and components to be quickly installed and removed while maintaining a clean concealed appearance. The bonded plate design provides additional mounting flexibility where direct screw fixing may not be practical, making it ideal for decorative panels, access panels, shopfitting and exhibition installations. The push-on engagement mechanism ensures fast assembly while supporting repeated removal and refitting without compromising performance.

Manufactured from durable high-performance materials, this professional fixing system offers reliable long-term operation in demanding commercial and interior fit-out environments. Supplied complete with screws and nuts in a convenient **pack of 100**, the Button-fix™ Type 3 Bonded Plate kit is ideal for high-volume installation and manufacturing projects.

Product Features

- **Professional Button-fix™ Type 3 bonded plate fixing system**
- Concealed push-on removable panel fixing design
- Supplied with screws and nuts for installation
- Strong and secure mechanical engagement
- Suitable for flush panel mounting applications
- Allows repeated assembly and removal
- Clean hidden fixing appearance

- **Pack quantity: 100 fixings**

Product Benefits

- Provides fast and secure push-on panel installation
- Creates a professional concealed flush finish
- Ideal for removable and modular panel systems
- Bonded plate design increases installation flexibility
- Reduces visible fixings and surface disruption
- Supports efficient commercial manufacturing and fit-outs
- Durable construction ensures reliable long-term performance

Technical Characteristics

- **Type 3 push-on bonded plate fixing mechanism**
- Concealed removable panel connector system
- Supplied complete with screws and nuts
- Durable high-performance fixing materials
- Reusable precision engagement design
- Commercial furniture and panel mounting compatible
- Professional installation and fit-out suitable
- **Supplied in packs of 100**

Applications

Button-fix™ Type 3 Bonded Plate with Screws & Nuts is ideal for shopfitting, furniture manufacturing, exhibition systems, removable wall panels, cabinetry, access panels, interior fit-outs and modular construction projects requiring concealed removable fixings with fast push-on installation and a clean flush appearance.
