Button-fix™ - Type 3 Flush Fix + Button - Push-on - Pack of 100

Variant code: 171-035-11

Button-fix™ Type 3 Flush Fix & Button is a professional push-on panel fixing system designed to provide strong, concealed and removable mounting for flush-fitting panels and furniture applications. Engineered for precision alignment and secure engagement, this innovative fixing solution offers fast installation and reliable performance across commercial, retail, exhibition and interior fit-out projects.

The Type 3 Flush Fix system features a low-profile push-on design that allows panels to sit flush against surfaces while remaining easily removable when required. Manufactured from durable high-performance materials, the fixing provides a secure mechanical connection suitable for repeated assembly and disassembly without compromising holding strength. The integrated button and fixing combination simplifies installation while delivering a clean concealed appearance.

Ideal for furniture manufacturing, exhibition stands, access panels, wall panelling, cabinetry and shopfitting applications, these Button-fix™ connectors provide an efficient alternative to visible mechanical fasteners. Supplied in a convenient **pack of 100**, this professional fixing system is suitable for high-volume installation and manufacturing environments.

Product Features

- **Professional Button-fix™ Type 3 Flush Fix system**
- Low-profile concealed push-on fixing design
- Flush-fitting removable panel connection
- Strong and secure mechanical engagement
- Suitable for repeated assembly and removal
- Fast and simple installation process
- Clean hidden fixing appearance
- **Pack quantity: 100 fixings**

Product Benefits

SWS HARDWARE
