Compact Lid Stay - Soft Down - Heavy Duty - Black

Variant code: CSD-10-TV-H-BL

Compact Lid Stay is a premium **heavy-duty soft-down stay** designed to provide smooth, controlled closing for **downward-opening flap doors, lids and cabinet fronts**. Finished in a contemporary **black**, this compact stay combines advanced damping technology with lift assistance to deliver quiet, safe and reliable operation. Its low-profile design makes it ideal where internal cabinet space is limited, while its heavy-duty construction ensures dependable performance for larger and heavier doors.

Featuring an integrated hydraulic damping mechanism, the stay slows the closing action to prevent slamming, reducing wear on furniture while improving user safety. The **Type H heavy-duty model** also incorporates a lift assist function, making heavy flap doors easier to open. Installation is quick and straightforward by aligning the stay with the cabinet sides and securing it with screws when used alongside **single-axis or drop hinges**. A supplied mounting template simplifies accurate positioning, while the **non-handed design** allows installation on either side of the cabinet. Mounted at the bottom of the cabinet interior, it preserves valuable storage space, and the matching cover provides a neat, coordinated finish.

Designed for premium residential, commercial and marine applications, the Sugatsune Compact Lid Stay offers a combination of elegant appearance, heavy-duty performance and smooth soft-close operation, making it an excellent choice for high-quality furniture and cabinetry.

Product Features

- Heavy-duty compact soft-down stay
- Designed for downward-opening flap doors and lids
- Integrated hydraulic soft-close mechanism
- Lift assist function for easier opening (Type H)
- Compact, space-saving design
- Black finish
- Suitable for use with single-axis and drop hinges
