

Concealed Door Loop

Variant code: 912.02.015

Concealed Door Loop: The Ultimate Solution for a Seamless and Secure Cable Run from Frame to Door

As a professional joiner or carpenter, you understand that the smallest details can make the biggest difference. In today's market, integrating electronic hardware—such as access control systems, keypads, and electric strikes—into your doors is a common requirement. The challenge lies in creating a clean, secure, and visually appealing cable run from the door frame to the door itself.

Our Concealed Door Loop is the definitive solution to this problem. Designed with precision and crafted for durability, it allows you to completely hide all cabling, delivering a flawless, professional finish that your clients will appreciate.

Key Features & Benefits:

- **Completely Concealed Installation:** The primary advantage of our product is its ability to be fully mortised into both the door and the frame. This ensures that no wires or protective loops are visible when the door is closed, providing a sleek, modern, and aesthetically pleasing result.
- **Enhanced Security:** By hiding the cables, you eliminate the risk of vandalism or tampering. This is crucial for high-security installations where exposed wires could be easily cut, compromising the integrity of the security system.
- **Durable & Robust Construction:** Made from high-quality, corrosion-resistant materials, our door loop is built to last. It is designed to withstand the repeated opening and closing of doors without wear and tear, ensuring long-term reliability.
- **Universal Compatibility:** The flexible design accommodates a wide range of low-voltage cabling, making it suitable for various applications, including:
 - Electric Strikes & Maglocks

- Access Control Systems & Keypads
- Door Contact Sensors
- CCTV & Alarm Systems
- **Easy & Efficient Installation:** Our door loop is engineered for straightforward installation. The included mounting hardware and a clear, detailed instruction guide make the process quick and efficient, saving you valuable time on the job site. The design allows for a clean and tidy cable run, preventing snags or damage during installation.
- **Ideal for a Variety of Projects:**
 - **Residential:** Upgrading home security with modern access control.
 - **Commercial:** Installing electronic hardware in offices, retail spaces, and public buildings.
 - **Healthcare & Education:** Securing rooms and sensitive areas with controlled access.

Why Choose Our Concealed Door Loop?

As a professional tradesperson, your reputation is built on the quality of your work. Using our Concealed Door Loop demonstrates a commitment to excellence and attention to detail. It not only solves a common problem but also elevates the perceived value of your finished project.

Don't settle for visible, unsightly, and vulnerable cable runs. Choose the professional's choice for hidden wiring. Our Concealed Door Loop ensures that your electronic door hardware installations are as secure and flawless as the doors you craft.
