

Concealed Overhead Door Closer c/w Single Action Arm Size 2-5 – Polished Nickel Plate

Variant code: 2845.01.PNP

Concealed Overhead Door Closer c/w Single Action Arm (Size 2-5) – Polished Nickel Plate

Evolve the aesthetics and functionality of your doors with our premium Concealed Overhead Door Closer, meticulously crafted with a sleek Polished Nickel Plate finish. This sophisticated door closer is designed for seamless integration, hiding discreetly within the door frame to maintain an uncluttered and elegant appearance. Perfect for both residential and commercial applications, its robust construction and adjustable features ensure reliable and controlled door closure, enhancing safety and convenience.

Key Features & Benefits:

- **Invisible Integration (Concealed Design):** Unlike traditional surface-mounted closers, this unit is installed within the door head, providing an unblemished aesthetic that complements any architectural style. Say goodbye to bulky hardware and hello to clean lines.
- **Adjustable Closing Force (Size 2-5):** Engineered to accommodate a wide range of door weights and sizes, this closer offers adjustable power settings from EN size 2 to 5. This versatility makes it ideal for everything from light internal doors to heavier commercial entrances, ensuring optimal closing performance.
- **Smooth & Controlled Closure:** Experience a consistent, quiet, and controlled closing action every time. This prevents slamming, reduces wear and tear on doors and frames, and minimizes noise in busy environments.
- **Single Action Arm:** Specifically designed for single-swing doors, the integrated single action arm provides efficient and reliable operation.

- **Durable Polished Nickel Plate Finish:** The stunning polished nickel plate not only adds a touch of modern sophistication but also offers exceptional resistance to corrosion, tarnishing, and everyday wear. This ensures long-lasting beauty and performance, even in high-traffic areas.
- **Enhanced Safety & Security:** By ensuring doors close fully and securely, this closer contributes to improved fire safety (by containing smoke and fire) and enhanced security against unauthorized access.
- **Energy Efficiency:** Prevents heat loss or gain by ensuring doors are always properly closed, contributing to better climate control and potential energy savings.
- **Compliance & Standards:** Designed to meet relevant industry standards for door closers, offering peace of mind regarding performance and reliability.
- **Easy Installation (Professional Recommended):** While designed for concealed installation, professional fitting is recommended to ensure optimal performance and adherence to safety standards. Full instructions are provided.

Ideal For:

- **Residential Homes:** Enhance the quiet operation and sophisticated look of interior doors, office doors, and utility rooms.
- **Commercial Offices:** Maintain a professional and quiet environment while ensuring security and accessibility.
- **Hotels & Hospitality:** Provide guests with a comfortable and seamless experience, reducing noise from closing doors.
- **Healthcare Facilities:** Contribute to a quiet and controlled environment, crucial for patient comfort.
- **Educational Institutions:** Manage traffic

flow and ensure doors close safely and securely in classrooms and common areas.

- **Retail Spaces:** Improve the customer experience by preventing slamming doors and ensuring secure entry/exit points.
