

Continuous Hinge – Inline Holes 600 x 38 x 1.5 x 7mm Pin – Weight Load 53kg – Self Colour Stainless Steel 304/Grade

Variant code: ACH60038SS

You're looking for a **robust, high-performance continuous hinge** solution? Look no further than this **premium-grade** 600mm stainless steel hinge. Designed for **heavy-duty** applications, it boasts a substantial **weight load capacity of 53kg**, making it ideal for everything from industrial access panels to large cabinet doors. Manufactured from **Self Colour Stainless Steel 304/Grade**, this **durable** material offers **superior corrosion resistance**, ensuring **long-lasting reliability** and a clean, professional appearance in demanding environments. Its precise dimensions of 600mm length, 38mm open width, and 1.5mm material thickness, along with a **7mm pin diameter**, guarantee a **smooth, continuous operation** along the full length of the joint.

Installation is straightforward thanks to the pre-drilled **inline holes**, providing a secure and even fixing for a **seamless fit** every time. This **piano hinge**—also known as a **butt hinge** or **strip hinge**—is a **versatile** and **essential component** for projects requiring a **full-length hinge** for **maximum support** and **security**. When you need a **reliable, high-load stainless steel hinge** that combines **unmatched strength** with a **sleek, self-colour finish**, this **corrosion-resistant 304-grade** option is the **professional choice**. Choose this **heavy-duty continuous hinge** for **dependable performance** and **enhanced structural integrity** in your next build or repair.
