

DORMA Rectangular Floor Pivot 8560GE – Stainless Steel – 200kg

Variant code: 65540059

DORMA Rectangular Floor Pivot 8560GE – Stainless Steel – 200kg

A pinnacle of **premium, high-performance door hardware**. This expertly engineered floor pivot is designed for **heavy-duty applications**, offering exceptional **durability, stability, and control** for large and heavy doors.

Key Features & Benefits

- **Robust Load Capacity:** The 8560GE is built to handle an impressive **maximum door weight of 200kg**, making it an ideal solution for oversized, glass, or timber doors in commercial and residential settings.
- **Superior Durability:** Crafted from **stainless steel (SSS)**, this floor pivot is highly resistant to **corrosion, wear, and rust**, ensuring a long-lasting and reliable operation even in high-traffic areas.
- **Precision Engineering:** The **smooth and controlled motion** of the pivot provides a **safe and secure closing action**, preventing slamming and protecting both the door and the frame. Its **rectangular design** offers a sleek, minimal, and discreet aesthetic.
- **Versatile Application:** Perfect for use with **architectural hardware**, this pivot is a **versatile component** suitable for a wide range of door types, including **frameless glass doors**, wooden doors, and metal doors.
- **Easy Installation:** The **user-friendly design** facilitates a straightforward and efficient installation process, making it a **preferred choice** for architects, builders, and installation professionals.
