

## Double Action Floor Spring – Non Hold Open – EN1 to 4 – Antique Brass

**Variant code: 2825.32.AB**

This **Double Action Floor Spring** in an elegant **Antique Brass** finish offers a reliable and concealed solution for controlling double-action doors. Designed for doors with a **non-hold open** function, this floor spring ensures smooth and controlled closing every time, enhancing safety and convenience within any commercial or residential environment.

This robust unit is suitable for doors ranging from **EN1 to EN4** in power size, accommodating a variety of door weights and widths. The included **cover plate** provides a neat and aesthetically pleasing finish once installed, seamlessly blending with your existing door hardware.

### Key Features:

- **Double Action:** Allows the door to swing in both directions, ideal for high-traffic areas.
- **Non Hold Open:** Ensures the door automatically returns to a closed position, improving security and energy efficiency.
- **EN1-4 Power Size:** Versatile design suitable for a range of door weights and widths, offering flexibility in application.
- **Antique Brass Finish:** Provides a classic and sophisticated aesthetic, adding a touch of elegance to your door.
- **Complete with Cover Plate:** Ensures a clean and finished appearance after installation, concealing the mechanism.
- **Includes Accessories:** Comes with all necessary fixings and installation instructions for a straightforward setup.
- **Durable Construction:** Engineered for long-lasting performance and reliability in demanding environments.
- **Concealed Installation:** The mechanism is installed within the floor, offering a discreet and unobtrusive solution.
- **Smooth and Controlled Closing:** Prevents slamming and ensures a gentle closing action.
