

Euro Profile Cylinder – 35mm x 35mm (Key) – Keyed to Differ – Polished Chrome

Variant code: 2430.3535.PC.TD

Secure Your Property with a Reliable Euro Profile Cylinder

Enhance the security of your doors with this high-quality **Euro Profile Cylinder**. Measuring **35mm** on each side (**35mm x 35mm**), this cylinder is designed to fit most standard **Euro cylinder** lock cases commonly found in **UPVC doors**, **composite doors**, and some **timber doors**.

This particular cylinder is **keyed to differ**, meaning each cylinder operates with its own unique set of keys. This provides a high level of individual security, ensuring that one key will not open another lock fitted with this type of cylinder.

The attractive **polished chrome** finish not only offers a sleek and modern aesthetic that complements various door hardware but also provides a durable and corrosion-resistant surface, ensuring long-lasting performance.

Key Features:

- **Euro Profile Cylinder:** Standard shape for wide compatibility.
- **35mm x 35mm:** Equal length on both sides of the cylinder (70mm overall).
- **Keyed to Differ (KTD):** Each cylinder has a unique keying, enhancing security.
- **Polished Chrome Finish:** Provides a stylish appearance and durable protection.
- **Secure Locking Mechanism:** Designed to offer reliable security for your property.
- **Easy Installation:** Can be fitted quickly and easily with basic tools.
- **Ideal for:** UPVC doors, composite doors, timber doors, patio doors, and external doors requiring a **Euro cylinder lock**.
- **Durable Construction:** Built to withstand everyday use.
- **Replacement Cylinder:** Perfect for upgrading existing or replacing damaged cylinders.

This **Euro Profile Cylinder** in **polished chrome** offers a dependable and aesthetically pleasing
