

Euro Profile Cylinder 35mm (Key) / 35mm (Key) - Open - To Differ - Black

Variant code: 2430.3535.BK.TD

The **Euro Profile Cylinder** is a premium **70mm (35mm/35mm)** key-to-key cylinder designed to provide dependable security for residential and commercial doors. Featuring an equal **35mm/35mm** configuration, this cylinder is ideal for doors requiring keyed access from both sides. Supplied as an **Open - To Differ** cylinder, each lock is provided with its own unique key combination, delivering enhanced individual security for standalone door installations.

Manufactured with precision-engineered internal components, the cylinder delivers smooth, reliable key operation and consistent locking performance throughout its service life. Finished in a contemporary **Black** coating, it offers a stylish alternative to traditional finishes while coordinating perfectly with modern black door furniture and architectural hardware. Its robust construction ensures excellent durability, making it suitable for both new installations and replacement projects.

Combining reliable performance, enhanced security and contemporary styling, this Euro Profile Cylinder is an excellent choice for homeowners, contractors and facilities managers seeking a durable locking solution that complements modern architectural designs.
