

Hawa Clipo 16 Soft Close System – Up to 8kg

Variant code: 053.3332.071

Hawa Clipo 16 Soft Close: Effortless & Silent Sliding for Lightweight Cabinetry

Improve your craftsmanship and deliver superior quality with the Hawa Clipo 16 Soft Close System. This innovative, concealed sliding hardware is the perfect solution for creating smooth, silent, and effortlessly functioning doors on your lightweight cabinetry projects. Engineered with the discerning professional in mind, the Clipo 16 system is ideal for a wide range of applications, from small kitchen cabinets and bathroom vanities to bespoke furniture and interior design features.

Key Features & Benefits for Your Business:

- Integrated Soft Close & Soft Open Technology:** The Clipo 16 system features a single, integrated soft close damper that provides a gentle, controlled closing action. This not-so-common "soft-open" feature cushions the door as it reaches its fully open position, preventing slamming and extending the life of both the door and the hardware. This dual-action mechanism is a significant value-add for your clients, demonstrating a commitment to quality and user experience.
- Effortless, Tool-Free Assembly (Clipo Technology):** Hawa's patented Clipo technology allows for incredibly fast and easy installation. The door simply clips onto the running gear without the need for tools, saving you valuable time on the job site. This intuitive design minimises installation errors and streamlines your workflow, improving your overall project efficiency.
- Precision-Engineered for Reliability:** Crafted with Swiss precision, the Clipo 16 system is built to last. The high-quality components ensure smooth, consistent operation for years to come, reducing the need for callbacks and ensuring client satisfaction. It's a testament to your professional standards and a guarantee

of long-term performance.

- **Minimalist, Concealed Design:** The hardware is completely hidden from view, creating a clean, modern aesthetic that complements any design style. This allows your craftsmanship to take center stage, showcasing the quality of your joinery without the distraction of visible tracks or rollers.
- **Lightweight Capacity, Heavyweight Performance:** Designed for doors up to 8kg (17.6 lbs) and door thickness from 16 to 19 mm, the Clipo 16 is perfectly suited for a wide range of lightweight materials, including MDF, plywood, and solid timber. The system maintains its smooth operation even with frequent use, ensuring a premium feel on every project.

Applications:

- **Kitchen & Bathroom Cabinets**
- **Office & Media Units**
- **Bespoke Furniture**
- **Built-in Wardrobes**
- **Interior Sliding Panels**
- **Display Cabinets**
