

## Hawa Concepta II – Connector Connecting Profile – Bottom Left / Top Right – 500mm (1' 7 11/16"), Aluminium, Anodized

Variant code: 24170

**Seamlessly connect aluminium profiles with our 500mm (1' 7 11/16") Connector connecting profile.**

Designed for a secure bottom-left to top-right connection, this plain anodized aluminium profile offers a durable, professional, and aesthetically pleasing finish for your industrial, commercial, or DIY projects.

Introducing the ultimate solution for robust and precise aluminum profile joining: our 500 mm (1' 7 11/16") Connector connecting profile. Expertly engineered to create a strong and reliable bottom-left to top-right connection, this component is a game-changer for anyone working with aluminum extrusion systems.

### Key Features & Benefits:

- **Optimal Connection:** Specifically designed for a secure bottom-left to top-right orientation, this connector ensures a perfect fit and a seamless, gap-free joint.
- **Premium Quality Material:** Crafted from high-grade aluminium, this profile is both lightweight and incredibly strong. The plain anodized finish provides a durable, corrosion-resistant surface that is easy to clean and maintain.
- **Precision Engineering:** With a length of 500 mm (1' 7 11/16"), this profile offers ample length for various applications, ensuring stability and structural integrity.
- **Versatile Applications:** Ideal for a wide range of uses, including:
  - **Industrial Frames:** Build sturdy machine guards, workbenches, and assembly lines.
  - **Commercial Displays:** Construct retail shelving, exhibition booths, and signage.
  - **DIY & Prototyping:** Create custom furniture, automation projects, and laboratory setups.

- **Automotive & Robotics:**  
Assemble lightweight yet strong chassis and enclosures.

**Specifications:**

- **Length:** 500 mm (1'7 11/16")
- **Material:** Aluminium, plain anodized
- **Connection Orientation:** Bottom-left to top-right
- **Compatibility:** Designed for standard aluminium profile systems (please check your profile dimensions for compatibility).

**Why Choose Our Connector Connecting Profile?**

When it comes to building strong, reliable, and professional-looking structures, the quality of your components matters. Our Connector connecting profile is more than just a piece of metal; it's a precision-engineered component that simplifies your assembly process, enhances the stability of your projects, and delivers a clean, professional finish.
