

Hawa Junior 250 Top Track – Alu Anodized – Predrilled – 4500mm

Variant code: 20990.4500

HAWA Junior 250 Top Track – Aluminium
Anodized – Predrilled – 4500mm

Elevate your sliding door system to the next level of performance and durability with the **HAWA Junior 250 Top Track**. Engineered in Switzerland with precision and quality in mind, this 4500mm anodized aluminium track is the perfect solution for creating seamless, reliable, and aesthetically pleasing sliding door installations. Designed for professional tradesmen, architects, and DIY enthusiasts alike, this pre-drilled track simplifies installation and guarantees a superior finish every time.

Key Features & Benefits:

- **Exceptional Durability:** Crafted from high-grade **anodized aluminum**, this track is built to withstand the test of time. The anodization process provides a hard, corrosion-resistant surface that protects against wear, scratches, and the elements, making it ideal for both interior and exterior applications.
- **Smooth & Silent Operation:** The precision-engineered profile of the HAWA Junior 250 track ensures a friction-free glide for your sliding door. When combined with the corresponding HAWA Junior 250 running gear, you'll experience an incredibly quiet and effortless sliding motion, enhancing the user experience and the overall quality of your project.
- **Easy & Efficient Installation:** Say goodbye to time-consuming drilling. This track comes **pre-drilled** with mounting holes, saving you valuable time and ensuring perfect alignment every time. The **4500mm length** offers excellent versatility for a wide range of door widths, reducing the need for multiple joins.
- **Aesthetic & Modern Design:** The sleek **aluminium anodized finish** provides a clean, contemporary look that complements any design aesthetic. Whether you're working on a minimalist residential project or a high-end

commercial space, this track will integrate seamlessly and add a touch of modern sophistication.

- **Versatile Application:** The HAWA Junior 250 system is designed to handle heavy-duty loads of up to 250 kg (550 lbs), making it suitable for a diverse range of applications. Use it for:
- **Large Interior Doors:** Create impressive room dividers, office partitions, or closet doors.
- **Heavy Wooden Doors:** Ideal for solid wood or MDF doors where a robust solution is needed.
- **Commercial Applications:** Perfect for commercial spaces, conference rooms, and hospitality projects.
- **Swiss Engineering & Quality:** HAWA is a world-renowned leader in sliding hardware systems. When you choose the HAWA Junior 250 track, you're investing in a product that embodies decades of **Swiss precision**, reliability, and innovation.

Technical Specifications:
