

Hawa Porta 100 GW Wall Mounting Angle Profile – Aluminium Anodized – 2500mm

Variant code: 057.3100.250

Hawa Porta 100 GW Wall Mounting Angle Profile – Aluminium Anodized – 2500mm

The Hawa Porta 100 GW Wall Mounting Angle Profile is an essential component for creating a sleek and professional sliding door system. Designed for use with the Hawa Porta 100 GW hardware, this high-quality aluminium angle profile provides a robust and reliable mounting solution for your glass sliding doors.

Key Features:

- **Superior Quality:** Made from durable, high-grade aluminium, this angle profile is built to last. The anodized finish provides excellent resistance to corrosion and wear, ensuring long-term performance and a pristine appearance.
- **Easy Installation:** The Hawa Porta 100 GW Wall Mounting Angle Profile is engineered for straightforward installation. Its precise dimensions and pre-drilled holes make it easy to secure the profile to the wall, saving you time and effort during the setup process.
- **Sleek and Modern Design:** The clean lines and minimalist design of the anodized aluminium profile blend seamlessly with any architectural style. It provides a discreet yet strong support for your sliding doors, enhancing the overall aesthetic of your space.
- **Perfect Compatibility:** This angle profile is specifically designed to work with the Hawa Porta 100 GW sliding door system, guaranteeing a perfect fit and optimal functionality.
- **Versatile Application:** Ideal for a wide

range of applications, including residential, commercial, and hospitality settings. Use it to install sliding glass doors in offices, hotels, restaurants, and modern homes.

- **Dimensions:** With a length of 2500mm, this profile provides ample length for most standard door openings.
