

Hawa Straightening fitting for 1715mm – 2275mm – Black Anodized

Variant code: 056.3192.081

Hawa Straightening Fitting for 1715mm – 2275mm – Black Anodized

The Ultimate Solution for Perfectly Flat Doors and Panels

As a professional joiner or carpenter, you understand that a perfectly straight, flat panel is the hallmark of quality craftsmanship. Timber panels, especially those of significant length, are prone to warping and bowing due to changes in moisture and temperature. Don't let this compromise your work. The Hawa Straightening Fitting is the definitive solution for actively preventing and correcting a bowed or warped door, ensuring your finished product is always flawless.

Engineered for Professionals, Built to Last

This high-performance straightening fitting is specifically designed for panels ranging from **1715mm to 2275mm** in length. Its robust construction and intelligent design make it the go-to choice for a wide range of applications, including:

- **Tall cabinet doors and wardrobe doors:** Keep tall, slender doors perfectly aligned for a clean, uniform look.
- **Sliding door panels:** Ensure smooth, silent operation without the friction caused by a warped panel.
- **Furniture panels and architectural woodwork:** Maintain the integrity and beauty of large wood panels in custom-built furniture, wall panelling, and more.
- **High-end bespoke joinery:** Deliver exceptional quality with a product that guarantees long-term stability.

Key Features & Benefits

- **Active Straightening Mechanism:** Unlike

passive solutions, the Hawa fitting allows for precise, active adjustment. The integrated tensioner lets you apply targeted pressure to counteract existing bowing and prevent future warping.

- **Invisible Integration:** The fitting is designed to be fully recessed and hidden within the panel. Once installed, it is completely invisible, preserving the aesthetic integrity of your work.
- **Durable Black Anodized Finish:** The elegant black anodized finish provides a sleek look and exceptional resistance to corrosion, ensuring the components remain strong and functional for years to come.
- **Simple & Efficient Installation:** The system is engineered for professional use, with clear instructions and a straightforward installation process that saves you valuable time on site.
- **Wide Application Range:** This specific model is a perfect fit for panels with a length of **1715mm to 2275mm**. We also stock a full range of sizes to meet all your project requirements.
- **Premium Hawa Quality:** Hawa is a globally recognised leader in high-quality hardware systems. By choosing Hawa, you are investing in a product trusted by professionals worldwide for its reliability and performance.

Technical Specifications:
