

Heavy Locking Drop Down Bolt 18" – Hot Dipped Galvanised

Variant code: LDDDB18GB

Introducing the **Heavy Duty 18" Drop Down Bolt**, a robust and reliable solution for securing gates, sheds, and doors. This **heavy-duty drop bolt** is crafted from solid steel and has been **hot-dipped galvanised** for superior protection against rust and corrosion, ensuring **long-lasting durability** even in the harshest outdoor conditions.

Key Features & Benefits

- **Exceptional Security:** The **18-inch length** provides a deep and secure drop, making it an ideal **gate locking mechanism** for both residential and commercial properties. Its heavy construction offers a strong deterrent against forced entry.
- **Corrosion-Resistant:** The **hot-dipped galvanised** finish creates a thick, protective zinc coating that seals the steel from the elements, preventing rust and extending the life of the bolt. This makes it a perfect choice for **outdoor gate hardware**.
- **Easy Installation:** Designed for a straightforward setup, this **drop-down bolt** can be easily mounted to various surfaces, including wood, metal, and composite materials.
- **Versatile Application:** Use it as a **heavy gate bolt**, a **shed door lock**, or a **stable door bolt**. Its versatility makes it suitable for a wide range of applications where a **secure locking solution** is needed.
- **Smooth Operation:** The bolt features a user-friendly handle for easy lifting and dropping, ensuring smooth and reliable operation every time.
