

IR Proximity Switch 240V Motion Detector – inc 1.5 Mtr Cable to Sensor Head – Black

Variant code: LSS25030BK

Premium IR Proximity Switch (240V, Black)

Looking for an **energy-efficient** and **reliable** way to automate your lighting? This **premium IR Proximity Switch** is the ideal solution. Designed for maximum **convenience** and **seamless integration**, this **240V motion sensor** provides instant, hands-free activation of lights and other electrical loads. Its sleek **black finish** ensures it blends effortlessly into any environment, while the **1.5-meter cable** linking the control box to the **compact sensor head** offers **flexible installation** options, even in tight spaces.

- **High Power Handling:** Operates directly at **240V AC**, compatible with most standard residential and commercial lighting circuits.
- **Effortless Installation:** Features an integrated **1.5 Mtr cable** connecting the main control unit to the **discreet sensor head**. This setup ensures **easy mounting** and optimal positioning for detection.
- **Infrared (IR) Technology:** Utilises advanced **Infrared Proximity Detection** for highly **accurate** and **instantaneous** sensing of movement, providing **reliable activation** every time.
- **Sleek & Discreet Design:** The entire unit, including the sensor head, comes in a **modern black finish** for a low-profile, aesthetic appearance in ceilings, cabinets, or furniture.
- **Energy Saving & Automatic:** Perfect for automating lighting in wardrobes, cabinets, pantries, corridors, and garages. **Automatically** turns lights **ON** upon detection and **OFF** after a set time, drastically reducing power consumption.
- **Versatile Application:** Suitable for use

with various lighting types, including **LED**, fluorescent, and incandescent bulbs.
