

PC-SM1AC – Standard Clip – Translucent Surface Mount Acoustic Male

Variant code: PC-SM1AC

PC-SM1AC – Standard Clip – Translucent Surface Mount Acoustic Male

The **PC-SM1AC Standard Clip** is a versatile and durable acoustic mounting solution engineered for a wide range of applications, from professional installations to DIY projects. This translucent, surface-mount acoustic male clip offers a strong, secure, and invisible fixing method for acoustic panels, wall panels, and joinery components.

Key Features and Benefits

- **Invisible Mounting:** The translucent design and surface-mount application ensure a clean, seamless finish. Once installed, the clip is completely hidden, preserving the aesthetic integrity of your panels. This is ideal for high-end architectural and interior design projects.
- **Acoustic Performance:** Specifically designed for acoustic panels, the clip provides an air gap between the panel and the wall. This crucial space enhances the panel's sound absorption properties, leading to improved acoustic performance in studios, home theaters, offices, and conference rooms.
- **Easy Installation:** Featuring a simple two-part system (the PC-SM1AC male clip and a corresponding female clip, sold separately), this product makes installation quick and efficient. The clip can be easily screwed or glued onto the panel and wall, simplifying the mounting process for both professionals and enthusiasts.
- **High-Strength Hold:** Despite its low-profile design, the PC-SM1AC offers a robust and reliable hold. It can securely support heavy panels, ensuring they remain firmly in place over time.

Ideal for Professionals and DIYers

This clip is a go-to solution for **joiners, carpenters, and professional installers** who need a reliable and discreet fixing method for their projects. It's perfect for mounting:

- **Architectural panels**
- **Wall cladding**
- **Cabinetry components**
- **Exhibition stands**

For the **productive DIYer**, the **PC-SM1AC** simplifies complex panel mounting tasks. Whether you're upgrading your home theater with acoustic treatments, creating a feature wall, or building custom furniture, this clip provides a professional-grade solution that is easy to use.
