

Portman Single Standard Door Kit – FD30 – 623–926mm W – up to 2100mm H

Variant code: PFD30.SD

Portman Single Standard Door Kit – FD30 Fire-Rated – 623–926mm W x up to 2100mm H

Elevate your space with the ultimate in safety, style, and seamless design.

The Portman Single Standard Door Kit is a revolutionary, complete solution for creating a modern, sleek pocket door system. Engineered for both new builds and renovation projects, this kit provides a space-saving and stylish alternative to traditional hinged doors, perfect for any room in your home or office.

Key Features & Benefits:

- **FD30 Fire-Rated Protection:** Gain peace of mind with a certified 30-minute fire resistance rating. The included intumescent strips expand in the event of a fire, sealing the gap and preventing the spread of smoke and flames. This makes it an ideal choice for internal doors requiring enhanced safety, such as those leading to kitchens, garages, or living spaces.
- **Space-Saving Design:** Reclaim up to 8% of floor space that a traditional swinging door would occupy. This pocket door system slides discreetly into the wall, offering unparalleled design flexibility and a clean, minimalist aesthetic. It's the perfect solution for small rooms, ensuites, utility rooms, and open-plan living areas.
- **Adjustable & Versatile:** This kit is designed to fit a wide range of standard door sizes, accommodating widths from **623mm to 926mm** and heights up to **2100mm**. The adjustable frame allows for a perfect fit, even with non-standard door sizes (door and handle sold separately).
- **Easy & Quick Installation:** The pre-assembled cassette system simplifies the installation process, making it a favourite for both DIY enthusiasts and

professional tradespeople. The self-centering runners and patented "easy-clip" brackets ensure a smooth and efficient build, saving you time and effort on site.

- **Smooth & Silent Operation:** The high-quality running gear and carriages guarantee a quiet, effortless glide every time you open or close the door. Experience the luxury of a door that operates with a satisfying, whisper-quiet motion.
- **Heavy-Duty Construction:** Built with a robust galvanised steel frame and a durable track, this kit is designed for longevity and can support doors weighing up to **80kg**. You can be confident in a product that is built to last.
- **Comprehensive Kit:** This product is a complete solution. It includes the pre-assembled galvanised steel pocket, a heavy-duty track, intumescent fire strips, and all necessary fixings and screws.
