

Premium Invisi Sockets for Round Wardrobe Rail – 25mm Diameter Ø – Aztec Bronze Light

Variant code: WBIR25010ABL

Transform your closet into a high-end boutique space with our **Premium Invisi Sockets for Round Wardrobe Rails**. Specifically engineered for **25mm diameter rails**, these sockets eliminate unsightly flanges and visible screw heads, providing a seamless "floating" aesthetic for your hanging space.

Product Features & Benefits

- **Ultra-Minimalist "Invisi" Design:** The unique two-part construction hides all fixings. Once installed, the sleeve slides over the internal bracket, leaving only a clean, professional finish.
- **Precision Fit for 25mm Rails:** Designed specifically for standard **25mm round wardrobe tubes**, ensuring a snug, wobble-free fit that prevents the rail from rotating or sliding.
- **Superior Load-Bearing Capacity:** Crafted from high-grade materials (available in Polished Chrome or Brass), these sockets are built to support heavy winter coats and full wardrobe collections without sagging.
- **Easy DIY Installation:** Whether you are a professional cabinet maker or a DIY enthusiast, the straightforward screw-in internal bracket makes installation quick and efficient.
- **Versatile Application:** Perfect for fitted wardrobes, walk-in closets, alcove hanging rails, and even retail garment displays.

Technical Specifications

Feature	Details
Compatible Rail	25mm

Feature	Details
Diameter	
Material	High-Strength Zinc Alloy / Steel
Available Finishes	Polished Chrome, Brushed Nickel, Polished Brass
Fixing Type	Concealed (Invisible) Screw Mount
Pack Quantity	1 Pair (Left and Right Sockets)

Invisi Sockets vs. Standard Wardrobe Brackets

Traditional U-brackets or flange sockets often ruin the look of a custom-built wardrobe with exposed screws and bulky edges.

Feature	Premium Invisi Sockets	Standard Flange Brackets
Aesthetics	Modern, "floating" look; no visible screws.	Visible screw heads; industrial look.
Security	Full 360° enclosure prevents rail lift.	U-shape can allow rail to "pop out."
Space	Slim profile allows for maximum hanging.	Wider footprint can waste side space.
Durability	Heavy-duty reinforced core.	Often thin-walled stamped metal.

Frequently Asked Questions (FAQ)

1. Can these sockets be used with any 25mm rail?

Yes, these are designed to be compatible with any standard **25mm round wardrobe tube**, regardless of the material (Chrome, Stainless Steel, or Wood).

2. Are the screws included in the pack?

Most of our Premium packs include the necessary fixing screws. We recommend using #4 or #5 wood screws if you are mounting directly into MDF or timber cabinetry.

3. How much weight can these sockets hold?

When fixed into a solid substrate (like a timber stud or solid wood wardrobe side), a pair of these

sockets can comfortably support upwards of **40k** – **50kg**, depending on the strength of your rail.

4. Can I use these for an alcove or wall-to-wall rail?

Absolutely. Because the sleeve slides over the rail before it is clicked into the internal bracket, they are the ideal solution for tight "wall-to-wall" installs where you don't have room to slide the rail in from the top.
