Push Plate, Radiused Corners - Drilled & Countersunk 350 x 75mm - Satin Anodised Aluminium

Variant code: PP350X75R.SAA

The **Push Plate** is a premium architectural door protection plate designed to protect door surfaces from everyday wear while providing a clear push point for users. Measuring **350 x 75mm**, this push plate features **radiused corners** and comes **drilled and countersunk** for quick, secure and professional installation on a wide range of internal and external doors.

Manufactured from high-quality metal for excellent durability, the push plate helps protect doors against scuffs, scratches and impact damage caused by frequent use. The smooth radiused corner design provides a modern appearance while improving safety, and the drilled and countersunk fixing holes allow for a neat, flush installation using appropriate fixing screws.

Ideal for commercial buildings, public facilities and residential developments, the Push Plate offers a practical and attractive solution for extending door life while complementing contemporary architectural ironmongery.
