

Blum Revego duo Pocket Profile Set – NL 450mm – Left

Variant code: 802P450D.L3

Blum REVEGO duo Pocket Profile Set – NL 450mm

Unlock the Potential of Every Space with Blum REVEGO

For professional joiners, cabinet makers, and carpenters, the Blum REVEGO duo Pocket Profile Set – NL 450mm is the ultimate solution for creating intelligent, multi-functional living and working environments. This innovative, fully-integrated pocket door system from Blum allows you to design seamless, minimalist interiors by effortlessly concealing entire furniture runs, appliances, or even home office setups.

Why Choose REVEGO duo for Your Projects?

The REVEGO system is a game-changer for modern cabinet design. It combines Blum's renowned quality and engineering with a space-saving solution that clients love. The 450mm Nominal Length (NL) is meticulously designed for double-door applications, providing a clean, uncluttered aesthetic when closed and maximum accessibility when open.

Key Features & Benefits for Professionals:

- **Integrated Pocket Construction:** All essential components are intelligently integrated into a dedicated, narrow cabinet "pocket." This allows for pre-assembly in your workshop, simplifying on-site installation and protecting components during transport.
- **Seamless, Track-Free Design:** Unlike traditional pocket doors, REVEGO operates without a floor track, creating a clean, uninterrupted line from floor to ceiling. This is perfect for high-end kitchen, living room, and office installations.
- **Effortless Operation with TIP-ON:** The system is designed to work with Blum's TIP-ON motion technology (hinge bracket set required, sold separately). A simple

touch is all it takes to smoothly glide the doors into their pockets, offering a handle-less design that is both stylish and highly functional.

- **Precision and Durability:** Built with high-quality aluminum and certified for 40,000 opening and closing cycles, the REVEGO duo ensures long-lasting reliability and smooth, quiet motion. Precise 3D adjustment options make it easy to achieve a perfect gap layout.
- **Simplified Planning and Installation:** Blum provides comprehensive resources including CAD data, CNC templates, and detailed technical guides. This streamlines your workflow from the initial design phase to final installation, ensuring a professional and efficient process.
- **Versatile Applications:** The REVEGO duo is ideal for a wide range of custom projects. Use it to create a hidden pantry, a discreet laundry area, a minimalist media center, or a pop-up home office. The possibilities are endless.
