

Blum Revego Duo Track Set for Internal Width within the 1350mm Application – Right

Variant code: 802L1350DR3

As a joiner, carpenter, or cabinet maker, you know that the secret to exceptional work lies in the details. The Blum REVEGO Duo pocket door system provides an innovative and premium solution for creating dynamic, multi-functional spaces. This product description focuses specifically on the **Blum REVEGO Duo Track Set for Internal Width within the 1350mm Application – Right**, a critical component for a seamless and professional finish.

The REVEGO system redefines the concept of space by allowing you to completely open up or conceal entire areas of cabinetry with a simple touch. This track set is engineered for a right-hand application within an internal width of up to 1350mm, making it the ideal choice for a range of bespoke projects, from creating a hidden home office to a sleek, minimalist kitchen.

Key Features & Benefits for Trade Professionals:

- Integrated Technology, Simplified Installation:** The brilliance of REVEGO lies in its fully integrated fittings within a dedicated "pocket" construction. This means you can pre-assemble the entire pocket system in your workshop, ensuring precision and quality control before transporting it to the job site. This process significantly streamlines on-site installation, saving you valuable time and labour. Final assembly is straightforward: set up the pre-assembled pockets, align, install the doors and track, and make minor adjustments.
- Unmatched Design Flexibility:** With a standardized pocket width of 150mm, the REVEGO Duo track set allows for limitless design possibilities. You can seamlessly integrate it into a run of cabinets, use it for a standalone unit, or even combine it with REVEGO Uno (single door) applications for truly unique configurations. The full overlay fronts completely conceal the pocket when closed, creating a clean, uninterrupted

surface and a perfect gap layout.

- **Effortless User Experience:** Your clients will be delighted by the smooth and intuitive operation. The integrated TIP-ON motion technology allows for handle-less doors that open with a light touch. A simple push releases the door from the pocket and a second press slides it away, making it a joy to use. The system is also designed for easy 3-dimensional adjustment, ensuring a flawless fit and finish.
- **Durable & Reliable Blum Quality:** Manufactured from high-quality aluminum, this track set is built to last. It is certified for a durability of 40,000 opening and closing cycles, guaranteeing long-term performance and client satisfaction. For optimal results and longevity, we recommend using the specific Blum System Screws and a door straightener (sold separately).
- **Technical Specifications:**
 - **Application:** For REVEGO Duo, right-hand side.
 - **Internal Application Width:** Up to 1350mm.
 - **Track Length:** 1357mm (designed for the 1350mm application).
