Salice Air Plastic Gasket for Glass for Air Aluminium Door Profile - 3m

Variant code: D206AG3000

The **Salice Air Plastic Glass Gasket** is a genuine accessory designed specifically for use with the **Salice Air Aluminium Door Profile System**. Manufactured to provide a secure and precise fit, this plastic gasket cushions and retains glass panels within the aluminium profile, helping to ensure a stable installation while protecting the glass from direct contact with the frame.

Forming part of the **Salice Aluminium Accessories Range**, the gasket is supplied in a convenient **3 metre length**, allowing it to be cut to the required size for a variety of cabinet door applications. Its flexible construction enables straightforward installation while maintaining a neat, professional finish for premium aluminium-framed furniture.

Designed to complement Salice Air aluminium profile systems, this glass gasket provides a reliable solution for furniture manufacturers, cabinet makers and joinery professionals seeking high-quality components for contemporary residential and commercial furniture projects.
