

Split Cable Grommet 50mm ø External, 32.2mm ø Internal, 40.5mm ø Hole – Antique Brass

Variant code: CGF50AC

50mm Split Cable Grommet provides a durable and attractive cable management solution for desks, worktops, conference tables and office furniture. Designed with a **50mm external diameter, 32.2mm internal cable opening** and **40.5mm mounting hole requirement**, it allows cables to pass neatly through furniture while protecting them from wear and creating a professional, uncluttered finish.

Featuring a generous **1-1/4" (32.2mm) cable opening**, the split grommet can be easily separated to accommodate larger plugs, connectors and pre-terminated cables without the need to disconnect them. Manufactured from **zinc die-cast** material, it offers superior strength, durability and a premium appearance compared to plastic alternatives. The lid incorporates a **unique locking system**, while integrated rubber stoppers on the underside prevent the lid from rotating or becoming detached during use.

Available in **Black, Antique Brass and Satin Nickel** finishes, the grommet complements a wide range of furniture styles and commercial interiors. It provides a simple yet effective solution for organising power, data and communication cables in professional workspaces.

Product Features

- Premium split cable grommet for desks and furniture
- 50mm external diameter
- 32.2mm (1-1/4") internal cable opening
- Fits a 40.5mm diameter mounting hole
- Split design accepts larger plugs and pre-terminated connectors
- Heavy-duty zinc die-cast construction
- Locking lid with integrated rubber anti-rotation stoppers
- Available in Black, Antique Brass and Satin Nickel finishes

Product Benefits

- **Large split opening allows cables with fitted plugs to pass through easily**
- **Zinc die-cast construction provides excellent durability and a premium finish**
- **Locking lid prevents accidental opening or movement during use**
- Protects cables from abrasion and edge damage
- Creates a neat, organised workspace
- Suitable for power, data, telephone and AV cabling
- Available in multiple finishes to match furniture designs
- Quick and simple push-fit installation

Technical Characteristics

- Product Type: Split Cable Grommet
- Material: Zinc Die-Cast
- External Diameter: 50mm
- Internal Opening: 32.2mm (1-1/4")
- Required Hole Diameter: 40.5mm
- Design: Split Grommet with Locking Lid
- Lid Retention: Rubber Anti-Rotation Stoppers
- Suitable For: Power, Data, LAN, Telephone and AV Cables
- Available Finishes:
