

Straightening Fitting For Stabilisation of 1 Door – Door Heights 2240–2850mm – Anodised Aluminium

Variant code: 056.3192.071

Unlock Smooth Operation and Lasting Stability: Anodised Aluminium Door Straightening Fitting (2240–2850mm)

Is your tall door suffering from warping, bending, or sticking? Restore its smooth, reliable operation with our premium **Anodised Aluminium Door Straightening Fitting**. Specifically engineered for doors ranging in height from **2240mm to 2850mm**, this robust and aesthetically pleasing solution provides unparalleled **door stabilisation** and prevents future deformation.

Crafted from high-quality **anodised aluminium**, this fitting offers exceptional **durability, corrosion resistance**, and a sleek, modern appearance that seamlessly integrates with any door style. The anodising process not only enhances its visual appeal but also creates a tough, protective layer, ensuring long-lasting performance even in high-traffic areas.

This **door straightening kit** is the ideal remedy for doors experiencing issues such as:

- **Warped doors:** Correct existing bends and twists, ensuring a flat and even surface.
- **Sticking doors:** Eliminate friction and binding against the frame for effortless opening and closing.
- **Sagging doors:** Provide crucial support to prevent the door from dropping over time.
- **Difficult latching:** Ensure proper alignment with the door frame for secure and reliable locking.

Key Features and Benefits:

- **Effective Door Straightening:** Precisely engineered to apply controlled pressure and counteract warping.
- **Universal Height Compatibility:** Suitable for a wide range of tall doors, from **2240mm up to 2850mm**.

- **Premium Anodised Aluminium:** Offers superior strength, lightweight design, and exceptional **corrosion resistance**.
- **Enhanced Door Stability:** Provides long-term support to prevent future bending and maintain door integrity.
- **Improved Door Operation:** Ensures smooth, quiet, and effortless opening and closing.
- **Easy Installation:** Designed for straightforward fitting, saving you time and effort (professional installation recommended for optimal results).
- **Durable and Long-Lasting:** Built to withstand daily use, providing a reliable solution for years to come.
- **Sleek and Discreet Design:** The **anodised finish** offers a modern aesthetic that blends seamlessly with your door.
- **Prevents Costly Replacements:** By restoring your existing door, you avoid the expense of a complete door replacement.

Ideal for:

- **Interior doors**
- **Exterior doors**
- **Wooden doors**
- **Composite doors**
- **Tall doors** in residential and commercial settings

Invest in the longevity and smooth operation of your tall doors with our **Anodised Aluminium Door Straightening Fitting**. Say goodbye to sticking, warping, and sagging, and enjoy the peace of mind that comes with a stable and perfectly aligned door. Order yours today and experience the difference!
