Blum Tandem Runner - Full Extension plus BLUMOTION - 30KG - 520mm

Variant code: 560H5200B

Blum TANDEM Runner - Full Extension plus BLUMOTION - 30kg is designed to deliver smooth, controlled and reliable drawer movement in modern cabinetry. Manufactured by **Blum**, a globally recognised specialist in precision cabinet hardware, the TANDEM runner system combines concealed runner technology with **integrated BLUMOTION soft-close functionality** to ensure quiet and consistent drawer operation in residential and commercial furniture applications.

This concealed runner system provides **full extension**, allowing the drawer to open completely so the entire drawer interior remains accessible. The integrated **BLUMOTION soft-closing mechanism** ensures drawers close smoothly and quietly, reducing closing impact and improving overall user comfort. This controlled closing action also helps protect cabinet structures and drawer components from long-term wear.

The TANDEM runner mounts beneath the drawer, creating a **concealed installation** that preserves the clean internal appearance of cabinetry while maintaining stable and smooth running performance. Precision engineering ensures reliable drawer movement while supporting loads of up to **30kg**, making the runner suitable for frequently used drawers in kitchens, storage furniture and fitted cabinetry.

Manufactured with a durable **Nickel finish**, the runner integrates seamlessly with Blum drawer systems and accessories, maintaining compatibility across the wider Blum cabinet hardware platform. The system is available in multiple **nominal lengths**, including **520mm**, allowing cabinet manufacturers and installers to match the runner size to cabinet depth while maintaining consistent installation and performance.

Product Features

- **Full extension concealed drawer runner system**

SWS HARDWARE
