Blum Tandem Runner - Full Extension plus BLUMOTION (17 - 19mm Drawer Sides) - 30KG - 550mm

Variant code: 560F5500B

Blum TANDEM Runner - Full Extension plus BLUMOTION (17–19mm Drawer Sides) - 30kg is designed to deliver smooth, controlled and reliable drawer movement in modern cabinetry. Manufactured by **Blum**, a globally recognised specialist in precision cabinet hardware, the TANDEM runner system combines concealed runner technology with **integrated BLUMOTION soft-close functionality** to provide quiet and consistent drawer operation in residential and commercial furniture applications.

This concealed runner system provides **full extension**, allowing the drawer to open completely so the entire drawer interior is accessible. The integrated **BLUMOTION soft-closing mechanism** ensures drawers close smoothly and quietly, reducing impact on cabinet structures while improving overall user comfort. Designed specifically for drawers with **17–19mm drawer side thickness**, the runner delivers consistent performance across a wide range of cabinet constructions.

The TANDEM runner mounts beneath the drawer, creating a **concealed installation** that preserves the clean internal appearance of cabinetry while maintaining smooth and stable running performance. Precision engineering ensures reliable movement and supports loads of up to **30kg**, making the system suitable for everyday kitchen drawers, storage furniture and fitted cabinetry.

Manufactured with a **Nickel finish**, the runner integrates seamlessly with Blum drawer systems and accessories, ensuring compatibility within the wider Blum cabinet hardware platform. The runner is available in different **nominal lengths**, allowing cabinet manufacturers and installers to match the runner size to cabinet depth while maintaining consistent installation and performance.

Product Features

- **Full extension concealed runner system**

Applications

This runner system is used in **kitchen drawers, bedroom furniture, office storage units and fitted cabinetry** where smooth and controlled drawer movement is required. The full extension design allows complete access to drawer contents, making it particularly suitable for **kitchen storage drawers, utility cabinetry and frequently used storage areas**. With concealed installation and integrated soft-close functionality, the system is widely specified in **residential and light commercial joinery projects** requiring reliable performance, quiet operation and a refined cabinet finish.

Property	Value
Weight Capacity (kg)	30
