Panel Hanger - 30KG Capacity - 2700mm

Variant code: AWH03000

Panel Hanger System is a concealed aluminium mounting rail designed for the secure installation of architectural wall panels, decorative cladding and large-format interior panels. With a **30kg load capacity** and **2700mm length**, it provides a strong, reliable and easily removable fixing solution while maintaining a minimal **5mm gap from the wall** for a sleek, contemporary finish.

The innovative hanger design allows panels to be **attached and removed without the use of tools**, making future maintenance, inspection and replacement quick and efficient. Its continuous rail construction also simplifies the installation of adjoining panels, ensuring accurate alignment and creating seamless wall finishes across large areas.

Engineered for flexibility, the integrated **screw guide groove** allows mounting holes to be positioned anywhere along the rail, making installation faster and more adaptable to different substrates. The continuous support offered by the hanger also helps **reduce the risk of warping in large panels**, providing improved long-term stability and performance.

Product Features

- Concealed aluminium panel hanger system
- **30kg load capacity**
- **2700mm rail length**
- Tool-free panel attachment and removal
- Only **5mm clearance** between panel and wall
- Suitable for continuous panel installations
- Helps prevent warping of large-format panels
- Integrated screw guide groove for flexible fixing positions
- Durable corrosion-resistant aluminium construction
- Genuine Sugatsune architectural hardware

Product Benefits

- Enables fast installation and easy panel removal

Tel: 01626 333900

- Creates a clean, concealed architectural finish
- Simplifies installation of continuous wall panel systems
- Improves long-term panel stability
- Flexible fixing positions reduce installation time
- Provides convenient access for future maintenance or replacement

Technical Characteristics

- **Product Type:** Concealed Panel Hanger System
- **Brand:** Sugatsune
- **Model:** AUH-2700
- **Material:** Aluminium
- **Length:** 2700mm
- **Load Capacity:** 30kg
- **Wall Clearance:** 5mm
- **Installation:** Concealed Wall Mounted Rail
- **Panel Removal:** Tool-Free
- **Fixing Feature:** Integrated Screw Guide Groove

Applications

Panel Hanger System is ideal for **architectural wall cladding, decorative wall panels, commercial interiors, office fit-outs, hotels, retail displays, exhibition stands, public buildings, healthcare facilities and bespoke joinery**. Designed for **large-format removable panels**, it provides a secure concealed fixing that enables quick installation, easy maintenance and seamless alignment while helping to minimise panel warping over time.

Property	Value
Finish	Anodised Silver
Length (mm)	2700
Load Capacity (kg)	30
Material	Aluminium Alloy
