

Peka Forte – 170kg Soft Closing Set (only works in single applications)

Variant code: 100.1379.00

The **peka Forte soft-close set** is designed to control the **final phase of closing movement** on **single peka Forte heavy-duty drawer runner installations**, improving user comfort and perceived quality in large pull-out units. It guides the front panel smoothly into the closed position, reducing noise and impact in **tall or heavily loaded cabinets**.

The soft-close unit operates discreetly within the cabinet structure and is intended for applications where controlled closing is required without compromising the strength or stability of the runner. It is supplied as **upper and lower soft-close elements**, working together to provide consistent damping at the end of the closing cycle.

Manufactured from **zinc-plated steel and durable plastic**, the soft-close set is designed for reliable performance in professional furniture and joinery environments.

Please note:

- Not compatible with **Type 380 mm** peka Forte runners
- **Not suitable for dual (coupled) runner configurations**

Product Features

- Soft-close set for **single peka Forte drawer runner installations**
- Controls the **final closing movement** of the pull-out
- Reduces noise and impact when closing large cabinets
- Supplied as **upper and lower soft-close units**
- Discreet integration within the cabinet

structure

Product Benefits

- Improves user comfort on tall or heavily loaded pull-outs
- Prevents hard closing and impact damage
- Enhances perceived furniture quality
- Provides consistent, controlled closing performance
- Reduces wear caused by uncontrolled closing forces

Technical Characteristics

- Compatible with **peka Forte heavy-duty drawer runners**
- For use with **single-runner installations only**
- Not suitable for **dual (coupled) runner configurations**
- Supplied as **1 upper and 1 lower soft-close unit**
- Material: **Zinc-plated steel and plastic**
- Colour: **Black**

Applications

Used in **larder pull-outs, pantry units, and bespoke storage cabinets** where a **single peka Forte runner** is specified and controlled, quiet closing is required.
